Production, Perception, and Phonotactic Patterns Alexei Kochetov, 2013-12-16 First Published in 2002 Production Perception and Phonotactic Patterns presents the first experimental study of articulatory dynamics of Russian and of secondary articulents in general with a special focus on the nature of positional markedness scales one of the key concepts in the current phonological theory Optimality Theory Through a series of experiments the author questions the traditional assumption that positional markedness scales are directly encoded in Universal Grammar and provides an alternative account based on gestural recoverability This study combines a sophisticated and in depth analysis of language particular phonetic detail with wide cross linguistic generalisations and contributes to the increasingly influential body of research that investigates phonetic factors in the search for explanations of phonological universals

Raddoppiamento Sintattico in

Italian Doris Angel Borrelli, 2013-12-16 First Published in 2002 The Italian phenomenon known as raddoppiamento sintattico or sometimes raddoppiamento fonosintattico has received a vast amount of attention Long recognized in Italian grammar books the process consists of the gemination of a word initial consonant in certain environments The word raddoppiamento means doubling and it is deemed syntactic or phonosyntactic because the process spans word boundaries This offers a synchronic and diachronic cross dialectal study of this phenomenon **The Syntax of Possession in Japanese** Takae

Tsujioka, 2013-12-16 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series The aim of this thesis is to investigate the syntax of possession expressions in Japanese at the sentential level It starts with a background of possessive syntax and illustrates how Japanese presents us with an interesting case study of possessive syntax

The Synchronic and Diachronic Phonology of Ejectives Paul D. Fallon, 2013-12-16 This study is the first book length examination of ejectives and their phonological patterning deepening the empirical understanding of ejectives and contributing to both phonological theory and to typologies of sound change *Vowel Reduction in Optimality Theory*

Katherine Crosswhite, Alexander Jun, 2001 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company Morphologically Governed Accent in Optimality Theory John D. Alderete, 2013-12-19 Alderete examines the influences of morphological factors on stress and pitch accent within Optimality Theory

Distinctiveness, Coercion and Sonority Bruce Moren, 2013-12-16 This volume proposes a unified weight theory that challenges traditionally held beliefs regarding the vowel consonant dichotomy inherent in moraicity and illuminates many previously intractable issues An

Effort Based Approach to Consonant Lenition Robert Kirchner, 2013-12-16 The first serious typological survey of the lenition process in modern phonological literature **Quantity and Prosodic Asymmetries in Alemannic** Astrid

Kraehenmann, 2009-04-07 The comprehensive analysis of the segmental and metrical system of the Swiss German dialect of Thurgovian provides a significant contribution to both phonetic and phonological theory Based on the author's original fieldwork and experimental investigations it is the first in depth study of this area tracing it back also to its Old High German roots particularly that of the dialect of Notker Quantity alternations notably word initial long short consonantal alternations asymmetric neutralization of phonetic phonological contrasts stress and weight are most prominent among the theoretical issues on which Thurgovian phonology is brought to bear Second Language Writing Systems Vivian Cook, Benedetta

Bassetti, 2005-05-23 *Second Language Writing Systems* looks at how people learn and use a second language writing system arguing that they are affected by characteristics of the first and second writing systems to a certain extent independently of the languages involved This book presents for the first time the effects of writing systems on language reading and writing and on language awareness and provides a new platform for discussing bilingualism biliteracy and writing systems The approach is interdisciplinary with contributions not only from applied linguists and psychologists but also corpus linguists educators and phoneticians A variety of topics are covered from handwriting to spelling word recognition to the mental

lexicon and language textbooks to metalinguistic awareness Though most of the studies concern adult L2 learners and users other populations covered include minority children immersion students and bilingual children While the emphasis is on English as the L2 writing system many other writing systems are analysed as L1 or L2 Arabic Chinese Dutch Gujarati Indonesian Irish Italian and Japanese Approaches that are represented include contrastive analysis transfer poststructuralism connectionism and corpus analysis The readership is SLA and bilingualism researchers students and teachers around the world language teachers will also find much food for thought

True to Form Christine Gunlogson, 2004-06-01 This book is concerned with the meaning and use of two kinds of declarative sentences 1 It s raining 2 It s raining The difference between 1 and 2 is intonational 1 has a final rise indicated by the question mark while 2 ends with a fall Christine Gunlogson s central claim is that the meaning and use of both kinds of sentences must be understood in terms of the meaning of their defining formal elements namely declarative sentence type and rising versus falling intonation Gunlogson supports that claim through an investigation of the use of declaratives as questions On one hand Gunlogson demonstrates that rising and falling declaratives share an aspect of conventional meaning attributable to their declarative form distinguishing them both from the corresponding polar interrogative Is it raining and constraining their use as questions On the other hand since 1 and 2 constitute a minimal pair differing only in intonation systematic differences in character and function between them in particular the relative naturalness of 1 as a question compared to 2 must be located in the contrast between the fall and the rise To account for these two sets of differences Gunlogson gives a compositional account of rising and falling declaratives under which declarative form expresses commitment to the propositional content of the declarative Rising versus falling intonation on declaratives is responsible for attribution of the commitment to the Addressee versus the Speaker respectively The result is an inherent contextual bias associated with declaratives which constitutes the crucial point of difference with interrogatives The compositional analysis is implemented in the framework of context update semantics Heim 1982 and others using an articulated version of the Common Ground Stalnaker 1978 that distinguishes the commitments of the individual discourse participants Restrictions on the use of declaratives as questions as well as differences between rising and falling declaratives as questions are shown to follow from this account Gunlogson argues that neither rising nor falling declaratives are inherently questioning rather the questioning function of declaratives arises through the interaction of sentence type intonation and context

Causes and Consequences of Word Structure Jennifer Hay, 2004-08-02 This book explores effects of speech perception strategies upon morphological structure Using connectionist modeling perception and production experiments and calculations over lexica Jennifer Hay investigates the role of two factors known to be relevant to speech perception phonotactics and lexical frequency Hay demonstrates that low probability phoneme transitions across morpheme boundaries exert a considerable force toward the maintenance of complex words and argues that the relative frequency of the derived form and the base significantly affects the decomposability of complex words While many

have claimed that high frequency forms do not tend to be decomposed Hay asserts that this follows only when such forms are more frequent than the bases they contain The results of Hay s experiments illustrate the tight connection between speech processing lexical representations and aspects of linguistic competence The likelihood that a form will be parsed during speech perception has profound consequences from its grammaticality as a base of affixation through to fine details of its implementation in the phonetics

Prosody in Medieval English and Norse Dr Nelson Goering, 2023-04-13 Prosody in Medieval English and Norse reconstructs aspects of linguistic prosody from the medieval records of two closely related languages English and Norse Evidence from a series of case studies points to continuity in the internal rhythms of words in these languages especially the enduring role of the bimoraic trochee
