The Basal Reader Approach to Reading Robert C. Aukerman, 1981

Comprehension [Grades K-12] Douglas Fisher, Nancy Frey, Nicole Law, 2020-08-20

Radically change the way students learn from texts extending beyond comprehension to critical reasoning and problem solving Is your reading comprehension instruction just a pile of strategies There is no evidence that teaching one strategy at a time especially with pieces of text that require that readers use a variety of strategies to successfully negotiate meaning is effective And how can we extend comprehension beyond simple meaning Bestselling authors Douglas Fisher Nancy Frey and Nicole Law propose a new comprehensive model of reading instruction that goes beyond teaching skills to fostering engagement and motivation Using a structured three pronged approach skill will and thrill students learn to experience

reading as a purposeful act and embrace struggle as a natural part of the reading process Instruction occurs in three phases Skill Holistically developing skills and strategies necessary for students to comprehend text such as monitoring predicting summarizing questioning and inferring Will Creating the mindsets motivations and habits including goal setting and choice necessary for students to engage fully with texts Thrill Fostering the thrill of comprehension so that students share their thinking with others or use their knowledge for something else Comprehension is the structured framework you need to empower students to comprehend text and take action in the world

Early Reading Instruction Diane McGuinness, 2006-01-20 Early Reading Instruction is a comprehensive analysis of the research evidence from early writing systems to computer models of reading In this book Diane McGuinness provides an innovative solution to the reading war the century old debate over the efficacy of phonics sound based versus whole word meaning based methods She has developed a prototype a set of elements that are critical to the success of a reading method McGuinness shows that all writing systems without exception are based on a sound unit in the language This fact and other findings by paleographers provides a platform for the prototype Other elements of the prototype are based on modern research For example observational studies in the classroom show that time spent on three activities strongly predicts reading success learning phoneme symbol correspondences practice at blending and segmenting phonemes in words and copying writing words phrases and sentences Most so called literacy activities have no effect and some like sight word memorization have a strongly negative effect The National Reading Panel 2000 summarized the research on reading methods after screening out thousands of studies that failed to meet minimum scientific standards In an in depth analysis of this evidence McGuinness shows that the most successful methods children reading a year or more above age norms include all the elements in the prototype Finally she argues because phonics type methods are consistently shown to be superior to whole word methods in studies dating back to the 1960s it makes no sense to continue this line of research The most urgent question for future research is how to get the most effective phonics programs into the classroom
