Active Landscape Photography Anne C Godfrey,2020-01-15 Photographs play a hugely influential but largely unexamined role in the practice of landscape architecture and design Through a diverse set of essays and case studies this seminal text unpacks the complex relationship between landscape architecture and photography It explores the influence of photographic seeing on the design process by presenting theoretical concepts from photography and cultural theory through the lens of landscape architecture practice to create a rigorous open discussion Beautifully illustrated in full color throughout with over 200 images subjects covered include the diversity of everyday photographic practices for design decision making the perception of landscape architecture through photography transcending the objective and subjective with photography and deploying multiplicity in photographic representation as a means to better represent the complexity of the discipline Rather than solving problems and providing tidy solutions to the ubiquitous relationship between photography and landscape architecture this book aims to invigorate a wider dialogue about photography s influence on how landscapes are understood valued and designed Active photographic practices are presented throughout for professionals academics students and researchers **The Late Victorian Gothic** Hilary Grimes,2016-03-03 Examining the automatic writing of the spiritualist s

ances discursive technologies like the telegraph and the photograph various genres and late nineteenth century mental science this book shows the failure of writers attempts to use technology as a way of translating the supernatural at the fin de si cle Hilary Grimes shows that both new technology and explorations into the ghostly aspects of the mind made agency problematic When notions of agency are suspended Grimes argues authorship itself becomes uncanny Grimes s study is distinct in both recognizing and crossing strict boundaries to suggest that Gothic literature itself resists categorization not only between literary periods but also between genres Treating a wide range of authors Henry James Rudyard Kipling Arthur Conan Doyle George Du Maurier Vernon Lee Mary Louisa Molesworth Sarah Grand and George Paston Grimes shows how fin de si cle works negotiate themes associated with the Victorian and Modernist periods such as psychical research mass marketing and new technologies With particular attention to texts that are not placed within the Gothic genre but which nevertheless conceal Gothic themes The Late Victorian Gothic demonstrates that the end of the nineteenth century produced a Gothicism specific to the period

their professional and personal identities Focusing on four key authors Thomas Hardy Bram Stoker Joseph Conrad and Virginia Woolf each of which had their own private and professional connections to photographs this book offers valuable historical contexts for contemporary cultural developments and anxieties At first establishing the authors response to developing technologies through their non fiction personal correspondences and working drafts Ennis moves on to examine how their perceptions of photography extend into their major works of fiction A Laodicean Dracula The Secret Agent The Inheritors and The Voyage Out Reflecting on the first graphic revolution in a world where text and image are now reproduced digitally and circulated en masse and online Ennis redirects our attention to when image and text appeared alongside each other for the first time and the crises this sparked for authors how they would respond to increasingly photographic depictions of everyday life and in turn how their writing adapted to a distinctly visual mass media

Singular Images, Failed Copies Vered

Maimon,2015-10-25 Focusing on early nineteenth century England and on the works and texts of the inventor of paper photography William Henry Fox Talbot *Singular Images Failed Copies* historicizes the conceptualization of photography in that era as part of a major historical change Treating photography not merely as a medium or a system of representation but also as an epistemology Vered Maimon challenges today's prevalent association of the early photograph with the camera obscura Instead she points to material formal and conceptual differences between those two types of images by considering the philosophical and aesthetic premises linked with early photography Through this analysis she argues that the emphasis in Talbot's accounts on the removal of the artist's hand in favor of the pencil of nature did not mark a shift from manual to mechanical and more accurate or objective systems of representation In *Singular Images Failed Copies* Maimon shows that the perception of the photographic image in the 1830s and 1840s was in fact symptomatic of a crisis in the epistemological framework that had informed philosophical scientific and aesthetic thought for two centuries **The Life and**
