Proceedings of Photon Migration and Imaging in Random Media and Tissues Society of Photo-optical Instrumentation Engineers,Biomedical Optics Society,1993 *Photon Migration and Imaging in Random Media and Tissues* ,1993 *Oxygen Transport to Tissue XII* J. Piiper,2013-03-09 The International Society on Oxygen Transport to Tissue ISOTT was founded in 1973 to facilitate the exchange of scientific information among those interested in any aspect of the transport and or utilization of oxygen in tissues Its members span virtually all disciplines extending from various branches of clinical medicine such as anesthesiology ophthalmology and surgery through the basic medical sciences of physiology and biochemistry to most branches of the physical sciences and engineering The seventeenth annual meeting of ISOTT was held in 1989 for four days from July 21 to 24 at the Max Planck Institute for Experimental Medicine and the adjoining University Hospital Klinikum in Goettingen Federal Republic of Germany It attracted 147 active registrants and approximately 40 accompanying persons The very successful format originated by Dr Ian Longmuir in 1985 consisting of posters accompanied

by an abbreviated oral summary was continued with slight modification Virtually all of the presentations utilized this format with each poster session preceded by a formal discussion during which the presenter briefly reviewed the poster aided by a few slides All posters remained in place for the entire four days of the meeting

Proceedings of Photon Propagation in Tissues ,1998 **Oxygen Transport to Tissue XI** Karel Rakusan,George P. Biro,Thomas K. Goldstick,2012-12-06 The Ottawa 88 meeting of the International Society for Oxygen Transport to Tissue attracted a record number of participants and presentations We were able to avoid simultaneous sessions and still keep the scientific program to four days by using poster sessions followed by plenary debate on each poster To paraphrase the British physicist David Bohm we tried to avoid an ordinary discussion in which people usually stick to a relatively fixed position and try to convince others to change This situation does not give rise to anything creative So we attempted instead to establish a true dialogue in which a person may prefer and support a certain point of view but does not hold it nonnegotiable He or she is ready to listen to others with sufficient sympathy and is also ready to change his or her own view if there is a good reason to do so Our Society is in its teen years and there are even some arguments about its exact age Many newer members have raised questions concerning the history of the Society For this reason I have asked one of the founding fathers D Bruley to prepare a brief account of the birth and early history of the Society which appears on the following page
