Physical Assessment of Patients Ruth Harris, 2008-04-21 Assessment is arguably the most important stage of nursing. It forms the basis for any planned nursing intervention and a baseline against which subsequent events in the hospital stay can be compared. Assessment is an ongoing activity where the patient is continually reviewed and care reappraised to ensure that the patient's needs are being met. The main aim of this study is to evaluate the reliability and validity of the Byron Physical Assessment Framework BPAF. The study involved scrutinising the BPAF to describe its purpose, conceptual basis and how it was developed. The BAF was then refined using extensive literature review and expert opinion to improve its comprehensiveness and clarity for its intended purpose. This monograph should be useful to all those attempting to construct and validate clinical assessment and measuring tools. Ruth Harris has the expertise necessary to do this in a sophisticated yet realistic way for practice colleagues.

Health Assessment and Physical Examination Mary Ellen Zator Estes, Pauline Calleja, Karen Theobald, Theresa Harvey, 2019-10-24 Health assessment is an ongoing process that evaluates the whole person as a physical, psychosocial and functional being, whether they are young or old, well or ill. This market leading text presents health assessment, physical examination, information and skills for health professionals who undertake these types of assessments. Health Assessment and Physical Examination is scaffolded from foundation to more advanced health assessment following a body systems approach and a head to toe approach. It uses the ENAP Examine Normal Abnormal Pathophysiology approach as a tool for students to collect useful information. An applied case study at the end of each chapter walks students through an example of an assessment. This comprehensive yet student friendly text is noted for its high quality case studies, pedagogical elements and excellent student resources. Unique to this text are the advanced topics and Urgent findings which highlights serious or life threatening signs or critical assessment findings that need immediate attention.
