Thompson, 2007-10-12 It gives me great pleasure to witness continued growth in the application of cognitive and behavioral theories and therapies to more diverse populations including in this volume their application to the mental health problems of later life Evidence continues to accumulate demonstrating that these are effective in treating a broad range of elderly patient groups This is the first book to examine a number of these evidence based interventions currently in use with older adults The editors have assembled chapters developed in many of

the leading clinical and clinical research programs focusing on elderly patients both in this country and in the UK Since the emphasis of this volume is primarily on clinical application each author group was asked to discuss the empirical data for the treatment strategies it is using with the specific patient group selected Typically this was followed by a detailed description of treatment procedures that were then illustrated by one or more clinical examples The book begins by examining the treatment of depressive and anxiety disorders and then moves on to more complicated and/or serious disorders including schizophrenia and other psychoses suicidal behavior personality disorders bipolar disorders dementia and complicated bereavement A chapter on the problems and issues in training therapists to use evidence based interventions effectively is also included along with a chapter discussing the implications of Medicare policies and guidelines for service delivery
