Beyond Eurocentrism Peter Gran, 2021-02-01 Eurocentrism

influences virtually all established historical writing With the rise of Prussia and by extension Europe eurocentrism became the dominant paradigm for world history Employing the approaches of Gramsci and Foucault Peter Gran proposes a reconceptualization of world history He challenges the traditional convention of relying on totalitarian or democratic functions of a particular state to explain and understand relationships of authority and resistance in a number of national contexts Gran maintains that there is no single developmental model but diverse forms of hegemony that emerged out of the political crisis following the penetration of capitalism into each nation In making comparisons between seemingly disparate and distinctive nations and by questioning established canons of comparative inquiry Gran encourages people to recognize the similarities between the West and non West nations

Blum,2009-01-01 When Porfirio D az extended his modernization initiative in Mexico to the administration of public welfare the families and especially the children of the urban poor became a government concern Reforming the poor through work and by bolstering Mexico s emerging middle class were central to the government s goals of order and progress But Porfirian policies linking families and work often endangered the children they were supposed to protect especially when state welfare institutions became involved in the shadowy traffic of child labor The Mexican Revolution which followed generated an unprecedented surge of social reform that was focused on families and accelerated the integration of child protection into public policy political discourse and private life In ways that transcended the abrupt discontinuities and conflicts of the era Porfirian officials revolutionary leaders and social reformers alike invoked idealized models of the Mexican family as the primary building block of society making families especially those of Mexico s working classes the object of moralizing reform in the name of state construction and national progress Domestic Economies Family Work and Welfare in Mexico City 1884 1943 analyzes family practices and class formation in modern Mexico by examining the ways in which family oriented public policies and institutions affected cross class interactions as well as relations between parents and children **Mexican**

Preaching Power Charles A. Witschorik, 2013-10-21 This book uses a gender perspective to examine sermons and other officially endorsed discourses of the Catholic Church in eighteenth and nineteenth century Mexico City Analyzing the different ways that over time gendered images metaphors and hagiographical examples were used in sermons and other documents the book examines how the church negotiated challenges to its cultural and ideological hegemony Beginning with sermons from the early eighteenth century the author follows the evolution of church discourses as preachers reveled in Baroque analogies embraced ideals of the Enlightenment targeted women s alleged moral vices at times of political crisis and ultimately turned to notions of women as the devout sex in order to combat incipient liberalism Put another way liberals after independence were not the only ones to assert a kind of republican motherhood preachers countered with a vision of Catholic motherhood that had great resonance in Mexico even into the twentieth century
