**Poor Support** David T. Ellwood, 1988-06-20 The subject of a New York Times Magazine cover story of December 8 1996 David Ellwood is one of the country's leading experts on poverty In this book he describes who the poor are explains why the

Well-being Beverley Searle, 2008-01-30 We are often told that money can't buy happiness But if money is not the answer then what is This book considers this question by examining empirical data stretching back almost 10 years Whereas previous concerns of individual well being have been drawn towards the negative outcomes of life experiences this book provides a new approach by directly addressing the circumstances under which high subjective well being is experienced often with surprising results Drawing on nine years of panel data the book examines demographic social spatial health domain satisfaction and socio economic circumstances in a rich and complex longitudinal study providing previously unknown information on factors associated with improved and sustained high well being It shows that subjective assessments of our circumstances are more important to well being than our objective conditions and suggests that high well being may be the key to improvements in people's subjective experience of a wide range of adverse and other life events It also highlights that high levels of well being are more likely to be associated with our social relationships and health status than with income or personal status and that affluence is no guarantee to high subjective well being and indeed may have negative consequences The 21st century is seeing the emergence of a positive science with a new focus on subjective well being This research adds new knowledge to the issues and debates which support the move towards a better understanding of the factors that promote subjective well being Such findings will be important to the international academic field as well as the national political arena where improving well being has become a part of the government's agenda **No Place Like Home**
