Popular Music, Cultural Politics and Music Education in China

Wai-Chung Ho, 2016-12-08 While attention has been paid to various aspects of music education in China to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China Before the implementation of the new curriculum reforms in China at the beginning of the twenty first century there was neither Chinese nor Western popular music in textbook materials Popular culture had long been prohibited in school music education by China's strong revolutionary orientation which feared spiritual pollution by Western cultures However since the early twenty first century education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum In relation to this topic this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education Ho presents music and music education as sociopolitical constructions of nationalism and globalization Moreover how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education as well as the reformation of music education in mainland China is discussed Based on the perspectives of school music teachers and students the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland

The Legacy of Cornelius Cardew Tony Harris, 2016-03-03 Cornelius Cardew is an enigma Depending on which sources one consults he is either an influential and iconic figure of British musical culture or a marginal curiosity a footnote to a misguided musical phenomenon He is both praised for his uncompromising commitment to world changing politics and mocked for being blindly caught up in a maelstrom of naive political folly His works are both widely lauded as landmark achievements of the British avant garde and ridiculed as an archaic and irrelevant footnote to the established musical culture Even the events of his death are shrouded in mystery and lack a sense of closure As long ago as 1967 Morton Feldman cited Cardew as an influential figure central to the future of modern music making The extent to which Cardew has been a central figure and a force for new ideas in music forms the backbone to this book Harris demonstrates that Cardew was an original thinker a charismatic leader an able facilitator and a committed activist He argues that Cardew exerted considerable influence on numerous individuals and groups but also demonstrates how the composer's significance has been variously underestimated undermined and misrepresented Cardew's diverse body of work and activity is here given coherence by its sharing in the values and principles that underpinned the

composer's world view The apparently disparate and contradictory episodes of Cardew's career are shown to be fused by a cohesive Cardew aesthetic that permeates the man his politics and his music **Equality in the Primary School** Dave
