British Pop Art and Postmodernism Justyna Stepień, 2015-09-18 British Pop Art was seen as an integral even central part of social change in the Sixties It was a movement that developed innovative ways of dealing with reality both reflecting on and participating in the culture Its aesthetics was often homogeneous with the industrial with the mass produced and hence with the artificial manufactured character of the urban environment This discontinuity in the traditional approach towards artistic creation furthered the globalization of diversity which constitutes the abiding concerns of postmodern art Drawing from postmodern thought and cultural analysis this book critically examines British Pop Art within the broad interdisciplinary domain of the social and cultural changes that led to flexibility in conceptualization and provides a contribution to the artistic processes which form and deform the cultural sphere confirming its relevance to current debates in which questions of postmodern aesthetics prominently figure

Art and Pluralism Nigel Whiteley, 2012 Through studying Lawrence Alloway s writings we can trace some of the major shifts in art and cultural values in the 1950s 1960s and 1970s

Postmodernism and History Willie Thompson, 2017-03-14 In this clear jargon free guide Willie Thompson provides a concise introduction to postmodernist theory and its significant impact on the study of history Although this is a hotly debated topic with much of the current literature being both polemical and inaccessible to the beginner Thompson offers straightforward explanations of complex concepts and shows how the debates are relevant to students own work

Postmodernism and History Considers the origins of postmodernism in both the ideas of poststructuralist thinkers particularly Michel Foucault and the political and cultural developments of the late 20th century Explores themes such as the treatment of historical evidence problems of historical representation feminist history ethical judgements on past events and the validity of metanarrative or long term historical explanation Discusses critically the work of a number of current and recent practicing historians including Joan Scott Roy Porter Patrick Joyce and James Vernon who have used postmodernist ideas in their writing Enquires how far postmodern thought has been absorbed into mainstream historiography

Art Criticism and Modernism in the United States Stephen Moonie, 2022-03-22 This study is an analysis of high and late modernist criticism in New York during the 1960s and early 1970s Through a close reading of a selection of key critics of the period which will expand the remit beyond the canonical texts the book examines the ways that modernist criticism s discourse remains of especial disciplinary interest Despite its alleged narrowness and exclusion the debates of the 1960s raised fundamental questions concerning the nature of art writing Those include arguments around the nature of value and judgement the relationship between art criticism and art history and the related problem of what we mean by the contemporary Stephen Moonie argues that within those often fractious debates there exists a shared discourse And further contrary to the current consensus that modernists were elitist

dogmatic and irrelevant to contemporary debates on art the study shows that there is much that we can learn from reconsidering their writings The book will be of interest to scholars working in art history modern art art criticism and literary studies

Geneses of Postmodern Art Paul Crowther, 2018-09-03 Postmodernism in the visual arts is not just another ism It emerged in the 1960s as a transformation of artistic creativity inspired by Duchamp's idea that the artwork does not have to be physically made by its creator Products of mass culture and technology can be used just as well as traditional media This idea became influential because of a widespread naturalization of technology where technology becomes something lived in as well as used Postmodern art embodies this attitude To explain why Paul Crowther investigates topics such as eclecticism the sublime deconstruction in art and philosophy and Paolozzi's Wittgenstein inspired works

A Hunger for Aesthetics Michael Kelly, 2012-05-15 For decades aesthetics has been subjected to a variety of critiques often concerning its treatment of beauty or the autonomy of art Collectively these complaints have generated an anti aesthetic stance prevalent in the contemporary art world Yet if we examine the motivations for these critiques Michael Kelly argues we find theorists and artists hungering for a new kind of aesthetics one better calibrated to contemporary art and its moral and political demands Following an analysis of the work of Stanley Cavell Arthur Danto Umberto Eco Susan Sontag and other philosophers of the 1960s who made aesthetics more responsive to contemporary art Kelly considers Sontag s aesthetics in greater detail In *On Photography* 1977 she argues that a photograph of a person who is suffering only aestheticizes the suffering for the viewer s pleasure yet she insists in *Regarding the Pain of Others* 2003 that such a photograph can have a sustainable moral political effect precisely because of its aesthetics Kelly considers this dramatic change to be symptomatic of a cultural shift in our understanding of aesthetics ethics and politics He discusses these issues in connection with Gerhard Richter s and Doris Salcedo s art chosen because it is often identified with the anti aesthetic even though it is clearly aesthetic Focusing first on Richter s Baader Meinhof series Kelly concludes with Salcedo s enactments of suffering caused by social injustice

Throughout *A Hunger for Aesthetics* he reveals the place of critique in contemporary art which if we understand aesthetics as critique confirms that it is integral to art Meeting the demand for aesthetics voiced by many who participate in art Kelly advocates for a critical aesthetics that confirms the power of art

The Oxford History of Western Art Martin Kemp, 2000

The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union

India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

Beginning Postmodernism Tim Woods, 2009 Postmodernism became the buzzword of contemporary society in the 1990s Yet even now it still remains confusing and baffling in its variety of definitions contexts and associations Beginning Postmodernism aims to offer clear accessible and step by step introductions to postmodernism across a wide range of subjects It encourages readers to explore how the debates about postmodernism have emerged from basic philosophical and cultural ideas and to develop comparative connections and ideas from one area to another With its emphasis firmly on postmodernism in practice the book contains questions designed to help readers understand and reflect upon a variety of positions within the following areas of contemporary culture philosophy and cultural theory architecture and concepts of space visual art sculpture and material culture popular culture and music film video and television and the social sciences

Art History After Modernism Hans Belting, 2003-08 Art history after modernism does not only mean that art looks different today it also means that our discourse on art has taken a different direction if it is safe to say it has taken a direction at all So begins Hans Belting's brilliant iconoclastic reconsideration of art and art history at the end of the millennium which builds upon his earlier and highly successful volume The End of the History of Art Known for his striking and original theories about the nature of art according to the Economist Belting here examines how art is made viewed and interpreted today Arguing that contemporary art has burst out of the frame that art history had built for it Belting calls for an entirely new approach to thinking and writing about art He moves effortlessly between contemporary issues the rise of global and minority art and its consequences for Western art history installation and video art and the troubled institution of the art museum and questions central to art history's definition of itself such as the distinction between high and low culture art criticism versus art history and the invention of modernism in art history Forty eight black and white images illustrate the text perfectly reflecting the state of contemporary art With Art History after Modernism Belting retains his place as one of the most original thinkers working in the visual arts today

Scale in Contemporary Sculpture Rachel Wells, 2017-07-05 The first book to devote serious attention to questions of scale in contemporary sculpture this study considers the phenomenon within the interlinked cultural and socio historical framework of the legacies of postmodern theory and the growth of global capitalism In particular the book traces the impact of postmodern theory on concepts of measurement and exaggeration and analyses the relationship between this philosophy and the sculptural trend that has developed since the early 1990s Rachel Wells examines the arresting international trend of sculpture exploring scale including American precedents from the 1970s and 1980s and work by the Young British Artists Noting that the emergence of this sculptural trend coincides with the end of the Cold War Wells suggests a similarity between the quantitative ratio of

scale and the growth of global capitalism that has replaced the former status quo of qualitatively opposed systems This study also claims the allegorical nature of scale in contemporary sculpture outlining its potential for critique or complicity in a system dominated by quantitative criteria of value In a period characterised by uncertainty and incommensurability Wells demonstrates that scale in contemporary sculpture can suggest the possibility of and even an unashamed reliance upon comparison and external difference in the construction of meaning Imagining the Present Richard Kalina, 2012-11-12 Bringing together twenty nine of Lawrence Alloway's most influential essays in one volume this fascinating collection provides valuable perspectives on the art and visual culture of the second half of the twentieth century Lawrence Alloway ranks among the most important critics of his time and his contributions to the spirited and contentious dialogue of his era make for fascinating reading These twenty nine provocative essays from 1956 to 1980 from the man who invented the term pop art bring art film iconography cybernetics and culture together for analysis and investigation and do indeed examine the context content and role of the critic in art and visual culture Featuring a critical commentary by Richard Kalina and preface by series editor Saul Ostrow Imagining the Present will be an enthralling read for all art and visual culture students **Art History For Dummies** Jesse Bryant Wilder, 2022-04-19 Ready to discover the fascinating world of art history Let's Van Gogh Fine art might seem intimidating at first But with the right guide anyone can learn to appreciate and understand the stimulating and beautiful work of history's greatest painters sculptors and architects In Art History For Dummies we'll take you on a journey through fine art from all eras from Cave Art to the Colosseum and from Michelangelo to Picasso and the modern masters Along the way you'll learn about how history has influenced art and vice versa This updated edition includes Brand new material on a wider array of renowned female artists Explorations of the Harlem Renaissance American Impressionism and the Precisionists Discussions of art in the 20th and 21st centuries including Dadaism Constructivism Surrealism and today's eclectic art scene Is there an exhibition in your town you want to see Prep before going with Art History For Dummies and show your friends what an Art Smartie you are An unbeatable reference for anyone looking to build a foundational understanding of art in a historical context Art History For Dummies is your personal companion that makes fine art even finer Art History Essentials George Michael Cohen, 2013-01-01 REA's Essentials provide quick and easy access to critical information in a variety of different fields ranging from the most basic to the most advanced As its name implies these concise comprehensive study guides summarize the essentials of the field covered Essentials are helpful when preparing for exams doing homework and will remain a lasting reference source for students teachers and professionals Art History highlights the history of art from the Ancient World to the Twentieth Century It includes illustrations and photos of Egyptian architecture Greek sculpture and Renaissance paintings and sculpture This book explains the different art movements such as Baroque and Neoclassicism and describes the kinds of materials that were used to create the various works This book is an ideal study aid for students who must familiarize themselves with major works of art how they were
