**Population and Development of the Arab Gulf States** Nadeya Sayed Ali Mohammed, 2017-03-02 This thought provoking study measures and critically examines the effects that an average population growth rate of 2.8% could have on the development of the Arab Gulf States. It questions the ability of Gulf governments to continue providing relatively high standards of education, health, and employment under conditions of rapid population growth, an undiversified economic base, and a tribal political framework.
