Population Policy and Reproduction in Singapore Shirley Hsiao-Li Sun, 2012 This book examines the relationship between population policies and individual reproductive decisions in low fertility contexts Using the case study of Singapore it demonstrates that the effectiveness of population policy is a function of competing notions of citizenship and the gap between seemingly neutral policy incentives and the perceived and experienced disparate effects Drawing on a substantial number of personal interviews and focus groups the book analyzes the developmental welfare state's overarching emphasis of citizen responsibility and examines population policies that reinforce social inequalities and ignore cultural diversity These factors combine to undermine elaborate state policy efforts in encouraging citizens' biological reproduction The book goes on to argue that in order to facilitate positive fertility decisions the state needs to modify the economic production at all cost approach and pay much more attention to the importance of social rights This suggests that the Singapore government might profitably approach the phenomenon of very low fertility with major initiatives similar to those of other advanced industrialized societies This book offers a significant contribution to the literature on social policy East Asian and Southeast Asian studies

**Population Policies and Programmes in Singapore** Saw Swee-Hock, 2016-06-22 The second edition of *Population Policies and Programmes in Singapore* presents an up to date and comprehensive account of the government's initiatives to influence the course of fertility and hence the rate of population growth in the island state of Singapore since the 1960s The varied population issues and consequences associated with the prolonged below replacement fertility are discussed in detail The strength of the book lies in the author's intimate familiarity with the subject acquired through some personal involvement in the formulation of population policies for the country      **The Population of Singapore (Third Edition)** Saw Swee-Hock, 2012 The third edition of this book presents a most comprehensive and up to date analysis of population trends and patterns in Singapore since its foundation in 1819 to the present day Separate chapters are devoted to population growth and distribution changing population structure migration mortality trends and differentials marriage trends and patterns divorce trends and patterns fertility trends and differentials family planning abortion and sterilisation fertility policies and programmes immigration policies and programmes labour force and future population trends The
