Population Economy And Welfare In Sweden:

Population, Economy, and Welfare in Sweden Tommy Bengtsson, 2012-12-06 Tommy Bengtsson The Swedish welfare model of the 1960s and 1970s excited great interest among many other countries Today it still is an ideal image for some but a warning for many others The reason why opinion about the Swedish welfare model has changed is primarily Sweden's financial problems which are associated with a badly financed and excessively large public sector It is argued that the size of the budget deficit is a great problem in itself but also and perhaps more importantly that the large public sector has negative effects on the entire economy since it leads to inefficient allocation of resources A first step in order to solve these problems is to examine how they arose The questions then are to what extent the large public sector which Sweden has today results from social entitlements which have come into existence since the 1960s from the maturing of welfare systems decided upon earlier from unfavourable demographic developments or from economic stagnation and how these factors are interlinked What is quite clear is that Sweden has had very low economic growth during the 1970s and 1980s compared with the preceding period But so have many other industrial countries without their having in consequence found themselves in difficulties as great as Sweden's Therefore economic stagnation alone cannot explain Sweden's situation **Population,**

Economy, and Welfare in Sweden Professor of Demography and Economic History Tommy Bengtsson, 1994-10-27 The Swedish welfare model has changed since the 1970s primarily due to Sweden's financial problems which are associated with an excessively large public sector Sweden has the highest proportion of old people in the world the highest proportion of cohabiting couples the highest proportion of children born outside wedlock and the highest proportion of refugees in relation to population This book deals with the development of the Swedish welfare system its present stage and problems analyses the causes including economic and demographic effects and shows solutions to the problems and what other countries can learn from the Swedish experience of the social welfare system **Population Ageing - A Threat to the Welfare State?**

Tommy Bengtsson, 2010-08-02 Tommy Bengtsson Population ageing the shift in age distribution towards older ages is of immense global concern It is taking place to a varying degree all over the world more in Europe and some Asian countries less on the African continent The worldwide share of people aged 65 years and above is predicted to increase from 7.5% in 2005 to 16.1% in 2050 UN 2007 p 11 The corresponding figures for developed countries are 15.5 and 26.2% and for developing countries 5.5 and 14.6% While population ageing has been going on for some time in the developed world and will continue to do so most of the change is yet to come for the developing world The change in developing countries however is going to be much faster than it has been in the developed world For example while it took more than 100 years in France and more than 80 years in Sweden for the population group aged 65 and above to increase from 7 to 14% of the population the same change in Japan took place over a 25 year period UN 2007 p 13 The scenario for the future is very similar for most developing countries including highly populated countries like China India and Brazil While the start and the speed differ the

Population and Development Geoffrey Hawthorn,2013-02-01 First published in 1978 this book explores the vital global issue of high and low fertility in poorer countries through a series of case studies by contemporary experts in the fields of development and demography These studies examine such issues as the relations between fertility rates and income distributions in poor societies the question of whether or not neo classical macro economics are sufficient to understand and to try to engineer relations between economies and populations and the specifics of the relations between fertility and a variety of socio economic factors in both South Asia and West Africa The point of the collection is to explain how very far general models can be taken and to suggest that they cannot be taken as far as those who have tended to ignore the structural complexities of and differences between various societies have implied **Sweden, Norway, Finland, Denmark**
