Routledge Handbook of Asian Demography Zhongwei Zhao, Adrian C. Hayes, 2017-12-14 Home to close to 60 per cent of the world's population Asia is the largest and by far the most populous continent. It is also extremely diverse physically and culturally. Asian countries and regions have their own distinctive histories, cultural traditions, religious beliefs, and political systems, and they have often pursued different routes to development. Asian populations also present a striking array of demographic characteristics and stages of demographic transition. This handbook is the first to provide a comprehensive study of population change across the whole of Asia. Comprising 28 chapters by more than 40 international experts, this handbook examines demographic transitions on the continent, their considerable variations, their causes and consequences, and their relationships with a wide range of social, economic, political, and cultural processes. Major topics covered include population studies and sources of demographic data, historical demography, family planning and fertility decline, sex preferences, mortality changes, causes of death, HIV/AIDS, population distribution and migration, urbanization, marriage and family, human capital and labour force, population ageing, demographic dividends, political demography, population and environment, and Asia's demographic future. This handbook provides an authoritative and comprehensive reference for researchers, policymakers, academics, students, and anyone who is interested in population change in Asia and the world.

The International Handbook of the Demography of Race and Ethnicity Rogelio Sáenz, David G. Embrick, Néstor P. Rodríguez, 2015-06-03 Examining key countries in every region of the world, this handbook presents population profiles and analyses concerning racial/ethnic disparities and changing intergroup relations. Inside, prominent scholars from various parts of the world and disciplines address the links between stratification, demography, and conflict across the globe. Organized by region, continent, coverage for each profiled country includes demographic information, a historical overview that addresses past racial/ethnic conflict, identification of the most salient demographic trends and issues that the country faces, theoretical issues related to the linkages between stratification, demography, and conflict, methodological issues including quality of data and cutting-edge methods to better understand the issue at hand, and details on the possible future of the existing trends and issues, with particular emphasis on public policy and human rights. This handbook will help readers to better understand the commonalities and differences that exist globally in the interplay between stratification, demography, and conflict. In addition, it also provides an excellent inventory of theoretical perspectives and methodological approaches that are needed to better comprehend this issue. This handbook will appeal to students, researchers, and policy analysts in the areas of race and ethnic relations, demography, inequality, international sociology, international relations, foreign studies, social geography, and social development.
