a major center of attention on the world stage with the U S military involvement in Afghanistan since 9 11 the ongoing concern over Islamic fundamentalism in Pakistan and India s emergence as a regional economic power In addition the age old problems of South Asia mass poverty poor infrastructure misgovernance rampant corruption political uncertainty and regional wars add to the increased interest in the region Incorporating the most current information available the expert international contributors to this handbook examine the economies and geo political developments of India Pakistan Afghanistan Nepal Bangladesh Sri Lanka and Bhutan They focus on three core areas of importance trade and development in the post WTO era of globalization macroeconomic adjustment and economic growth and poverty governance the war on terror and social indicators With its cutting edge analysis the handbook is an essential reference for all students researchers and practitioners dealing with the region

Development and Welfare Policy in South Asia Gabriele Koehler, Deepta Chopra, 2014-03-05 This book sheds light on social policies in six South Asian countries introduced between 2003 and 2013 examining the ways in which these policies have come about and what this reflects about the nature of the state in each of these countries It offers a detailed analysis of the nature of these policies introduced in recent years in Bangladesh India Maldives Nepal Pakistan and Sri Lanka and illustrates the similarities and differences in policy approaches amongst the six countries Through this analysis the book explores the thesis of whether there is a particular type of developmental welfare state that can be observed across South Asia The focus is on social policies or policies designed to address poverty and deliver welfare at the level of programming and design i e the stated intent of these policies The book also presents an analysis of the fiscal space available in each of the six countries thereby drawing conclusions about the financial feasibility of a developmental welfare state model in the region This comprehensive book uniquely explores critical aspects of policy debates on a possible move from welfare to rights It introduces students and researchers in development studies social policy and South Asian studies to innovative welfare programmes in South Asia and gives a new perspective on the nature and patterns of welfare in South Asia with the view of tackling inequality and promoting well being

Population and Development W.T.S. Gould, 2008-11-19 Population and Development addresses important issues at the heart of the problems of developing countries How these countries address the common difficulties of population growth including mortality and fertility decline population redistribution including internal migration and urbanization and also international migration for both source countries and for destination countries How and why has population change affected development both positively and negatively How and why has development affected population change both growth and distribution The book opens with an introduction preceding the ten substantive chapters covering some of the broader issues for population studies and development studies and the relationships between them The first three chapters set out the main concepts and theoretical discussions on how population affects development and also how development affects population Detailed chapters then cover each of the three main components of population change fertility mortality and finally migration These

are followed by chapters on the impacts of age structures including the potential for a demographic dividend and of the more qualitative aspects of human resource development through formal education and ICTs with further chapters on population policies and population futures. The book incorporates illustrative text boxes and case studies on regions in Africa, the Middle East and Asia which elaborate the broader theoretical and conceptual substance of the ten major chapters. Each chapter has Discussion Questions and Sources and Further Reading sections and there is an extensive integrated References section. The arguments of the book bring together a large but fairly loosely integrated literature from population studies, development studies and geography in a conceptually coordinated, empirically wide ranging and challenging discussion. It is targeted at an audience in undergraduate courses in Geography and in Masters courses in Development Studies and Population Studies. The book's succinct but erudite structure means it can be used either as a course text book or as a basic reference on a range of current issues and likely concerns at the interface between Geography, Development Studies and Population Studies.
