Prosperity, Region, and Institutions in Maritime China Billy K.L. So, 2020-03-23 Prosperity signifies success in economic performance Economic performance always takes place in a spatial context And institutions matter in economic performance These three interwoven themes underlie this inquiry into the regional economy of southern Fukien province during the Sung and Yuan dynasties when the area was one of the most prosperous regions in China Through a meticulous reading of the sources the author seeks to understand the meaning of prosperity in the premodern Chinese context and argues that we have to understand economic performance as a process occurring in space and influenced by institutions which affect economic actors particularly through the means of transaction costs

Remaking the Chinese City Joseph W. Esherick, 2001-10-31 In China today skyscrapers tower over ancient temples freeways deliver lines of cars and tour buses to imperial palaces cinema houses compete with old theaters featuring Peking Opera The disparity evidenced in the contemporary Chinese cityscape can be traced to the early decades of the twentieth century when government elites sought to transform cities into a new world that would be at once modern and distinctly Chinese Remaking the Chinese City aims to capture the full diversity of recent Chinese urbanism by examining the modernist transformations of China's cities in the first half of the twentieth century Collecting in one place some of the most interesting and exciting new work on Chinese urban history this volume presents thirteen essays discussing ten Chinese cities the commercial and industrial center of Shanghai the old capital Beijing the southern coastal city of Canton the interior's Chengdu the tourist city of Hangzhou the utopian New Capital built in Manchuria during the Japanese occupation the treaty port of Tianjin the Nationalists capital in Nanjing and temporary wartime capitals of Wuhan and Chongqing Unlike past treatments of early twentieth century China which characterize the period as one of failure and decay the contributors to this volume describe an exciting world in constant and fundamental change During this time the Chinese city was remade to accommodate parks and police paved roads and public spaces Rickshaws trolleys and buses allowed the growth of new downtowns Department stores theaters newspapers and modern advertising nourished a new urban identity Sanitary regulations and traffic laws were enforced and modern media and transport permitted unprecedented freedoms Yet despite their fondness for things Western and modern early urban planners envisioned cities that would lead the Chinese nation and preserve Chinese tradition The very desire for modernity led to the construction of a visible and accessible national past and the imagining of a distinctive national future In their investigation of the national capitals of the period the essays show how cities were reshaped to represent and serve the nation To promote tourism traditions were invented and recycled for the pleasure and edification of new middle class and foreign consumers of

culture Abundantly illustrated with maps and photographs *Remaking the Chinese City* presents the best and most current scholarship on modern Chinese cities Its thoroughness and detailed scholarship will appeal to the specialist while its clarity and scope will engage the general reader Contributors Michael Tsin on Canton Ruth Rogaski and Brett Sheehan on Tianjin David Buck on Changchun Kristin Stapleton on Chengdu Liping Wang on Hangzhou Madeleine Dong on Beijing Charles Musgrove on Nanjing Stephen MacKinnon on Wuhan Lee MacIsaac on Chongqing and Jeffrey Wasserstrom and David Strand with concluding essays

Revolution and Rebellion in the Early Modern World Jack A. Goldstone, 1991-04-02 What can the great crises of the past teach us about contemporary revolutions Arguing from an exciting and original perspective Goldstone suggests that great revolutions were the product of ecological crises that occurred when inflexible political economic and social institutions were overwhelmed by the cumulative pressure of population growth on limited available resources Moreover he contends that the causes of the great revolutions of Europe the English and French revolutions were similar to those of the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan The author observes that revolutions and rebellions have more often produced a crushing state orthodoxy than liberal institutions leading to the conclusion that perhaps it is vain to expect revolution to bring democracy and economic progress Instead contends Goldstone the path to these goals must begin with respect for individual liberty rather than authoritarian movements of national liberation Arguing that the threat of revolution is still with us Goldstone urges us to heed the lessons of the past He sees in the United States a repetition of the behavior patterns that have led to internal decay and international decline in the past a situation calling for new leadership and careful attention to the balance between our consumption and our resources Meticulously researched forcefully argued and strikingly original *Revolutions and Rebellions in the Early Modern World* is a tour de force by a brilliant young scholar It is a book that will surely engender much discussion and debate

Understanding Peasant China Daniel Little, 1989-01-01 In this innovative book Daniel Little compares the positions of various social scientists regarding debates in China studies Little focuses on four topics the relative importance of individual rationality and community values in explaining traditional peasant behavior the role of marketing and transportation systems in Chinese society the causes of agricultural stagnation in traditional China and the reasons for peasant rebellions in Qing China He not only makes a constructive contribution to these controversies but also provides examples of the diversity of social science research

Singing on the River Igor Iwo Chabrowski, 2015-08-25 *Singing on the River* by Igor Chabrowski based on Sichuan boatmen's work songs haozi explores the little known world of mentality and self representation of Chinese workers from the late 19th century until the outbreak of the Second Sino Japanese War 1937 Chabrowski demonstrates how river workers constructed and interpreted their world work and gender in context of the dissolving social cultural and

political orders Boatmen asserted their own values bemoaned exploitation and imagined their sexuality largely in order to cope with their low social status Through studying the Sichuan boatmen we gain an insight into the ways in which twentieth century nonindustrial Chinese workers imagined their place in the society and appropriated without challenging them the traditional values *Urban Networks in Ch'ing China and Tokugawa Japan* Gilbert Rozman, 2015-03-08 Ch'ing China and Tokugawa Japan were unusually urbanized premodern societies where about one half of the world's urban population lived as late as 1800 Gilbert Rozman has drawn on both sociology and history to develop original methods of illuminating the historical urbanization of China and Japan and to provide a way of relating urban patterns to other characteristics of social structure in premodern societies The author also hopes to redirect the analysis of premodern societies into areas where China and Japan can be compared with each other and with other large scale societies The author divides central places into seven levels and determines how many levels were present in each country century by century Through this method he is able to demonstrate how Japan was rapidly narrowing China's lead in urbanization and show that Japan was relatively efficient in concentrating resources in high level cities Explanations for differences in urban concentration are sought in a general discussion of the social structure of each country an analysis of marketing patterns a detailed study of Chihli province and the Kant region an examination of regional variations and a comparison of Peking and Edo which were probably the world's largest cities throughout the eighteenth century Originally published in 1974 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

China's Cultural Heritage Richard J Smith, 1994-07-20 Based on the author's careful rethinking of certain themes and arguments presented in the first edition this revised version of China's Cultural Heritage also draws heavily upon the enormous body of new scholarship on Chinese history and culture that has appeared in the last decade Although focused primarily on the Qing Dynasty the book not only sheds valuable light on the distant past but it also helps us to understand China's contemporary problems of modernization *The Rural Economy of Pre-liberation China* David Faure, 1989 This empirical study of the historical development of China's rural economy from the mid nineteenth century to the 1930s looks at the factors of farm tenancy and management the development of cash crops the Chinese banking system the growth of trade and other issues such as labor technology geography and political development to present a thought provoking discussion of the pessimistic and optimistic approaches to the plight of Chinese peasants and farmers *The American Asian Review*, 1985 **Fighting Famine in North China** Lillian M. Li, 2007 This monumental work provides a new perspective on the historical significance of famines in China over the past three hundred years It examines the relationship between the

interventionist state policies of the eighteenth century Qing emperors the golden age of famine relief the environmental and political crises of the nineteenth and early twentieth centuries when China was called the Land of Famine and the ambitions of the Mao era which tragically led to the greatest famine in human history In addition to a wide array of documentary sources the book employs quantitative analysis to measure the economic impact of natural crises state policies and markets In this way the theories of Qing statesmen that have received much attention in recent scholarship are linked to actual practices and outcomes Using the Zhili Hebei region as its focus the book also reveals the unusual role played by the institutions and policies designed to ensure food security for the capital Beijing
