**European Populations** Van der Kaa,2012-12-06 The changing demographic landscape which Europe is facing today and in the next decades reflects the past These changes constitute important challenges to European populations and societies Shifts in fertility and family formation in health morbidity and mortality in internal and international migration as well as changes in age structures in households in labour forces and in population growth and decline will influence the living conditions and well being of Europe s population directly or indirectly The demographic challenge also concerns the environment local regional and national developments education production and consumption patterns economic competitiveness social security housing employment and transport and health and social care provisions These issues their mechanisms determinants and consequences also challenge the scientific study of population As a major forum and market place for scientific demographic debate the 1999 European Population Conference EPC99 was organized to take up this challenge On the threshold of the third millennium European populations are united in diversity and face major demographic issues

*International Migration and the Future of Populations and Labour in Europe* Marek Kupiszewski,2013-02-11 The changes of populations are determined by fertility mortality and migration On the national level international migration is a factor of increasing demographic economic social and political importance This book addresses the debate on the impact of international migration and economic activity on population and labour force resources in future It presents a study conducted for 27 European countries looking 50 years ahead 2002 2052 An extended discussion of theories and factors underlying the assumed evolution of the components of change and economic activity is included as well as a detailed analysis of the historical trends These theoretical and empirical considerations lead to defining scenarios of future mortality fertility economic activity and international migration which have been fed into a projection model producing various future population dynamics and labour force trajectories In addition simulations have been made to estimate the size of replacement migration needed to maintain selected demographic and labour market parameters in the countries of Europe The results presented in this book allow researchers governments and policy makers to evaluate to what extent various migration and labour market policies may be instrumental in achieving the desired population and labour size and structures The secondary purpose of this volume is to reveal the methodology and argumentation lying behind a complex population forecasting and simulation exercise which is not done frequently but is critical for the assessment of the forecasts and also valuable from a purely didactic point of view

**Territoriality and Migration in the E.U. Neighbourhood** Margaret Walton-Roberts,Jenna Hennebry,2013-08-16 This volume brings together an interdisciplinary group of scholars around an important question how has migration changed in Europe as the European Union has enlarged and what are the consequences for countries and for migrants themselves inside and outside of these redrawn jurisdictional and territorial borders By addressing this question the book contributes to three current debates with respect to EU migration management

1 that recent developments in EU migration management represent a profound spatial and organizational reconfiguration of

the regional governance of migration 2 the trend towards the externalization or subcontracting of migration control and 3 how the implications of Europe's changing immigration policy are increasingly felt across the European neighborhood and beyond Based on new empirical research the authors in this collection explore these three processes and their consequences for both member and non member EU states for migrants themselves and for migration systems in the region The collection indicates that despite the rhetoric of social and spatial integration across the EU region as one wall has come down new walls have gone up as novel migration and security policy frameworks have been erected making European immigration more complex and potentially more influential beyond the EU zone than ever The American Bibliography of Slavic and East European Studies, 1977
