Population In The Global Arena:

Population in the Global Arena Parker G. Marden, 1982 **Population in the Global Arena** Parker G. Marden, 1981-06-01 **Population in the Global Arena** Parker G. Marden, 1982 A World of Populations Heinrich Hartmann, Corinna R. Unger, 2014-09-01

Demographic study and the idea of a population was developed and modified over the course of the twentieth century mirroring the political social and cultural situations and aspirations of different societies. This growing field adapted itself to specific policy concerns and was therefore never apolitical despite the protestations of practitioners that demography was natural. Demographics were transformed into public policies that shaped family planning, population growth, medical practice and environmental conservation. While covering a variety of regions and time periods, the essays in this book share an interest in the transnational dynamics of emerging demographic discourses and practices. Together they present a global picture of the history of demographic knowledge.

Participation, Representation and Global Civil Society Jane W. Muthumbi, 2010-03-18

This book focuses on religious fundamentalists' mobilization efforts against abortion in three United Nations Conferences: Using U.S. Christian and Egyptian Islamic fundamentalist groups as empirical cases, this account highlights these groups' efforts against the adoption of abortion in the 1984 Mexico Conference on Population, the 1994 Cairo conference on Population, and the 1995 Beijing Conference on Women. The account, which examines Northern U.S. Christian and Southern Egyptian Islamists' anti-abortion networks, participation and representation within these forums, provides a unique glimpse into their engagement within international institutions. It also explores whether Northern and Southern groups' growing involvement in decision-making processes has lessened the inequality that historically characterized North-South relations in the international arena and compares the strategies and tactics used by these groups as they attempted to influence the debate on reproductive rights within the conferences. PrepComs, regional forums, NGO Forums, and the state-dominated plenary sessions. It also assesses the extent to which these entities were effective in influencing outcomes in these arenas and comments on North-South relations in a contemporary context. Information on these groups was obtained from interviews with leaders of the U.S. Christian and Egyptian Islamic fundamentalist groups as well as secondary sources and official U.N. documents.

Global Studies Tuo Cai, Zhenye Liu, 2020-06-07

Since the 1950s, globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political, economic, military, environmental, and social fortunes of mankind. And yet, the existing theories in humanities and social sciences have been fundamentally built upon the traditional nation-state model. These two volumes, a pioneering work on global studies to be published out of China, aims at creating a new theoretical framework against the backdrop of globalization. This volume introduces core concepts and critical issues, deploying globalization as a theoretical framework and redefining the interrelationship between politics, economics, law, and globality. The two volumes are an essential reference for scholars and students in politics, economics, international relations, and law.

Coastal Waters of

the World Don Hinrichsen, 2013-03-19 Nearly 60% of the world's population lives and works within 100 miles of a coast and even those who don't are connected to the world's oceans through an intricate drainage of rivers and streams. Ultimately the whole of humankind is coastal. *Coastal Waters of the World* is a comprehensive reference source on the state of the world's coastal areas. It focuses on the tremendous pressures facing coastal areas and the management systems and strategies needed to cope with them. Don Hinrichsen explores the origins and implications of three related issues: the overwhelming threats to our coastal resources and seas from population and pollution; the destruction of critical resources through unsustainable economic activity; and the inability of governments to craft and implement rational coastal management plans. Introductory chapters present a concise summary of our coastal problems, including coastal habitat degradation and the fisheries crisis, along with a discussion of better management options. Three case studies of successful coastal governance focus on some of the problems and bring to life potential solutions. Following that are regional profiles that provide detailed information on the main population resource and management challenges facing each of the world's thirteen major coastal waters and seas. The profiles are presented in a standard format to allow for ease of comparison between regions and accessibility of information. The book ends with a realistic and practical agenda for action that can be implemented immediately. Safeguarding these complex interlinked ecosystems is humanity's most challenging management job. *Coastal Waters of the World* will help raise our awareness of coastal area concerns and provide a constructive contribution to the ongoing debate over how to manage these ever-changing areas both for ourselves and for future generations. It will serve as a valuable reference tool and an up-to-date resource for policymakers, management specialists, and students interested in sustainable coastal governance.

International Political Economy in Context Andrew C. Sobel, 2013 Focuses on a micro approach to political economy that grounds policy choices in the competitive environments of domestic politics and decision making processes.

Global Migrants, Global Refugees Aristide R. Zolberg, Peter M. Benda, 2001-06-01 In recent years several influential commentators have stated or strongly implied that the advanced industrial democracies are today being overwhelmed by a host of problems, including rapid population growth, the breakup of multi-ethnic states, environmental degradation, and increasing economic differentials between the developing and developed worlds for which no effective solutions are at hand. The migration-inducing potential of these post-Cold War developments has been a particular source of concern. This volume provides a counter-catastrophic view of developments and a more sober and balanced assessment of the challenges the United States and other industrial democracies face in the sphere of international migration than that offered in recent years. The first part is devoted to a diagnosis of the problem: revaluation of the notion of a migration crisis by examining the likely consequences of population growth, environmental degradation, and political conflict in the developing and post-communist worlds. Special attention is also given to the manifestations of these forces in the western hemisphere where they may have direct consequences for immigration to the United States. In the second part the implications for U.S.

policy are considered ranging from promotion of democracy and development of strategies for minimizing international migrations and refugee flows to the intricacies of humanitarian relief and intervention when preventive measures prove ineffective

International Migration and the Future of Populations and Labour in Europe Marek Kupiszewski, 2013-02-11

The changes of populations are determined by fertility mortality and migration On the national level international migration is a factor of increasing demographic economic social and political importance This book addresses the debate on the impact of international migration and economic activity on population and labour force resources in future It presents a study conducted for 27 European countries looking 50 years ahead 2002 2052 An extended discussion of theories and factors underlying the assumed evolution of the components of change and economic activity is included as well as a detailed analysis of the historical trends These theoretical and empirical considerations lead to defining scenarios of future mortality fertility economic activity and international migration which have been fed into a projection model producing various future population dynamics and labour force trajectories In addition simulations have been made to estimate the size of replacement migration needed to maintain selected demographic and labour market parameters in the countries of Europe The results presented in this book allow researchers governments and policy makers to evaluate to what extent various migration and labour market policies may be instrumental in achieving the desired population and labour size and structures The secondary purpose of this volume is to reveal the methodology and argumentation lying behind a complex population forecasting and simulation exercise which is not done frequently but is critical for the assessment of the forecasts and also valuable from a purely didactic point of view
