Van Dyke, 2005-12-01 This study utilizes a wide range of new source materials to reconstruct the day to day operations of the port of Canton during the eighteenth and first half of the nineteenth centuries Using a bottom up approach it provides a fresh look at the successes and failures of the trade by focusing on the practices and procedures rather than on the official policies and protocols The narrative however reads like a story as the author unravels the daily lives of all the players from sampan operators pilots compradors and linguists to country traders supercargoes Hong merchants and customs officials New areas to studies of this kind are covered as well such as Armenians junk traders and rice traders all of whom played intricate roles in moving the commerce forward The Canton Trade shows that contrary to popular belief the trade was stable predictable and secure with many incentives built into the policies to encourage it to grow The huge expansion of trade was in fact one of the factors that contributed to its collapse as the increase in revenues blinded government officials to the long term deterioration of the lower administrative echelons In the end the system was toppled but that happened mainly because it had already defeated itself General readers and academicians interested in world and Asian history trading companies country trade Hong merchants and articles of trade will find much new and relevant information here **Library of Congress Subject Headings** Library of Congress. Office for Subject Cataloging Policy, 1991 *A Primer of Dutch Seventeenth Century Overseas Trade* David William Davies, 2013-11-11 This volume is an attempt to give the American reader an idea of the extent of the Dutch network of trade in the seventeenth century Although some effort is made to sketch out however briefly the activities of the Dutch in various regions throughout the century emphasis has been placed on their first entrance into these areas in that period In each area the goods which the Netherlanders received have been indicated as well as the products they traded for them The arrangement of the chapters calls for an explanation Students of Dutch history will think of Surat and Persia as a natural unit and of Malabar and Ceylon Japan and China West Africa and Brazil as being other entities which one would naturally discuss together I have adopted the more obvious national divisions Persia India Japan Brazil etc as being more easily comprehensible for the casual reader Within the chapters I have then explained the trade connections between West Africa and Brazil Surat and Persia and so forth **P-Z** Library of Congress.
