Port Architecture Constructing The Littoral:

Port Architecture Peter Quartermaine, 1999-07-06 Port Architecture Constructing the Littoral In the latter half of the twentieth century the port has undergone one of the greatest and largely uncharted transformations in its history Since the 1960s and the onset of the dominance of the passenger jet and the container carrier ports have rapidly changed in both appearance and operation Once an integral element of many cities commercial activity they have become increasingly specialised mechanised and remote This is often literal as in the case of dedicated container ports which are now located outside central urban areas With geographical detachment has also come alienation from everyday human endeavour and the popular imagination Many of the original inner city ports have become derelict while others have been transformed into residential or leisure areas where speculative enterprises have been involved they have often attempted to capitalise on a synthetic or trivialised sense of the maritime as a promotion tool for everything from pizza parlours to penthouses By looking at a cross section of contemporary international ports Hong Kong London Marghera Venice Miami P O New Port Portsmouth Rotterdam and Sydney Peter Quartermaine not only accounts for the worldwide changes in the port s recent history but also redefines it as a modern built environment recasting it in the reader s mind s eye By using a combination of text and photographs he establishes a pertinent up to date visual narrative for the port and its commerce This transcends the dislocation with the maritime that has become part of Western culture since the 1960s as fewer people have first hand experience of working docks and shipping It also means that Quartermaine s study encompasses structures that have been conventionally placed at the margins of architecture These bring to light some of the most extraordinary constructions of the post industrial age breakwaters of tetrapods mechanical devices for water and cargo control straddle carriers for containers specialised plants for bulk handling and rationally appointed space for rapid sorting and transshipment *Bibliographic Guide to Art and Architecture* New York Public Library. Committee on Armed Services,2008 [The Swahili World](#) Stephanie Wynne-Jones,Adria LaViolette,2017-10-16 The Swahili World presents the fascinating story of a major world civilization exploring the archaeology history linguistics and anthropology of the Indian Ocean coast of Africa It covers a 1 500 year sweep of history from the first settlement of the coast to the complex urban tradition found there today Swahili towns contain monumental palaces tombs and mosques set among more humble houses they were home to fishers farmers traders and specialists of many kinds The towns have been Muslim since perhaps the eighth century CE participating in international networks connecting people around the Indian Ocean rim and beyond Successive colonial regimes have helped shape modern Swahili society which has incorporated such influences into the region's long standing cosmopolitan tradition This is the first volume to explore the Swahili in chronological perspective Each chapter offers a unique wealth of detail on an aspect of the region's past written by the leading scholars on the subject The result is a book that allows both specialist and non specialist readers to explore the diversity of the Swahili tradition how Swahili society has changed over time as well as

how our understandings of the region have shifted since Swahili studies first began. Scholars of the African continent will find the most nuanced and detailed consideration of Swahili culture, language, and history ever produced. For readers unfamiliar with the region or the people involved, the chapters here provide an ideal introduction to a new and wonderful geography at the interface of Africa and the Indian Ocean world, and among a people whose culture remains one of Africa's most distinctive achievements.
