Riding the Black Ship Aviad E. Raz, 2020-03-23 In 1996 over 16 million people visited Tokyo Disneyland making it the most popular of the many theme parks in Japan Since it opened in 1983 Tokyo Disneyland has been analyzed mainly as an example of the globalization of the American leisure industry and its organizational culture particularly the company manual By looking at how Tokyo Disneyland is experienced by employees management and visitors Aviad Raz shows that it is much more an example of successful importation adaptation and domestication and that it has succeeded precisely because it has become Japanese even while marketing itself as foreign Rather than being an agent of Americanization Tokyo Disneyland is a simulated America showcased by and for the Japanese It is an America with a Japanese meaning **Gravity's Ghost** Harry Collins, 2010-12-15 A gripping look at gravitational wave research and what it says about scientific discovery and the future of the scientific community This fine book pairs exploratory analysis with the pulse of a detective story Giving a portrait of the way a community chose to test itself on the threshold of new knowledge Collins offers the rich sociological insight that can only be won from uncommon experience from a long standing dialogue with the community he studies and from a moral engagement in the future of science Richard Staley author of Einstein's Generation The Origins of the Relativity Revolution In theory at least gravitational waves do exist We are constantly bathed in gravitational radiation which is generated when stars explode or collide and a portion of their mass becomes energy that ripples out like a disturbance on the surface of a serene pond But unfortunately no gravitational wave has ever been directly detected even though the search has lasted more than forty years As the leading chronicler of the search for gravitational waves Harry Collins has been right there with the scientists since the start The result of his unprecedented access to the front lines of physical science is Gravity's Ghost a thrilling chronicle of high stakes research and cutting edge discovery Here Collins reveals that scientific discovery and nondiscovery can turn on scientific traditions and rivalries that ideal statistical analysis rests on impossible procedures and unattainable knowledge and that fact in one place is baseless assumption in another He also argues that sciences like gravitational wave detection in exemplifying how the intractable is to be handled can offer scientific leadership a moral beacon for the twenty first century In the end Gravity's Ghost shows that discoveries are the denouements of dramatic scientific mysteries A sociologist embedded with full access in the LIGO Scientific Collaboration chronicles the search for gravitational waves Though physicists with very few exceptions are in no doubt that gravitational waves exist evidence for

their passage through the new kilometer length interferometers would nevertheless represent the scientific event of the twenty first century Harry Collins has turned the initial joined search exploiting the LIGO and Virgo instruments into a detective novel that exquisitely describes the social processes associated with discovery and statistical analysis in a large collaborative effort Francis Halzen University of Wisconsin Madison and Director of Icecube Neutrino Detector Project

Bradley's Ghost Ray Derby, 2003-10 When Running Wolf sees the crashed aircraft he photographs the corpses of the eighty seven souls as they disappear and the images bring to light the discovery of a diabolic deed The National Transportation Safety Board quickly determines this is beyond their scope of responsibility and requests assistance The investigation moves from the Sioux Indian Reservation and state of South Dakota to Washington D C when it becomes apparent that domestic terrorists with a biological agent are involved Federal agencies headed by FBI Agent Bill Bradley race against time in their attempt to discover and apprehend the masterminds behind the crime A scheduled bio terrorist exercise provides a perfect smoke screen for the aggressors to strike their first major blow to the citizens of the United States In the government s attempt to contain the threat within the borders of South Dakota the exercise changes to a genuine fight for survival It becomes clear that the state and local levels of government have been under funded and under trained to counter the real threat of a biological attack Support comes from a surprising entity as the Sioux and Cheyenne Indians sacrifice a sacred secret in order to offer safe haven to the citizens But will it be enough *Ghost Trails* Jill Homer, 2008 Most sports become inspirational when extraordinary people excel at ordinary things In ultra endurance racing ordinary people must excel at extraordinary things *Ghost Trails* is the true story of an ordinary person timid nonathletic raised in the suburbs of Salt Lake City and her unlikely route to one of the most difficult bicycle races in the world a 350 mile epic along Alaska s frozen Iditarod trail Through her struggles and intimate confrontations with her fears and weaknesses she discovers the surprising destination of her life s trails
