Portfolios Across The Curriculum And Beyond:

Portfolios Across the Curriculum and Beyond Donna J. Cole, 2000 A valuable resource of the types and uses of portfolios for teachers and teacher educators Great examples and guidelines Robert J Drummond University of North Florida Make portfolios work without all the work Learn how to use portfolios to increase your level of performance in the classroom and improve student assessment This updated easy to read step by step guide to using portfolios incorporates current teaching practices and cutting edge technology Here is an alternative method of evaluating student work that is painless and effective Teachers want to spend more time teaching and less time assessing Traditional assessment practices are time consuming and too often don't reflect the total progress of a student Standardized testing tells us how well a student tests rather than how much a student has learned Portfolio assessment offers a more complete picture of your students progress and frees you to be more creative with your students It offers Clear objectives to guide you through each chapter Rationale for an alternative to traditional assessment practices Portfolio guidelines by grade and subject Up to the minute technology for enhancing portfolio implementation This new jam packed version of *Portfolios Across the Curriculum and Beyond* should be the definitive portfolio book on the market A valuable resource for teachers administrators and teacher educators

Portfolios Across the Curriculum and Beyond Donna J. Cole, Charles W. Ryan, Fran Kick, Bonnie K. Mathies, 1995-08-30 This innovative book describes the implementation of student portfolios an alternative method of evaluation in current United States teaching practice The method requires students to select samples of work to represent their achievements in a particular subject over an entire semester discuss their reasons for selecting those pieces and describe how they feel about their progress The authors provide practical advice for teachers wishing to adopt or enhance this form of student evaluation

Beyond the Tyranny of Testing Kenneth J. Gergen, Scherto R. Gill, 2020-09-28 Measurement based assessment has dominated our educational systems at the expense of the learning and the well being of students and teachers In this book Gergen and Gill propose a radical alternative to this broken system which is based instead on an inspirational conception of schools as sites of collective meaning making and a relational orientation to evaluation The authors acknowledge that it is within the process of relating that the world comes to be meaningful for us and equally learning and well being are embedded in relational process which testing and grades undermine Providing detailed illustrations using cases from pioneering schools around the globe at both the primary and secondary level this book demonstrates how a relational orientation to evaluation in education can enhance learning processes foster students engagement vitalize relationships and elevate the evaluation of teaching and the school as a whole Featuring collaborative learning dialogic pedagogy and flexible curricula relational evaluation truly speaks to the demands of a rapidly changing world **Governmentality Studies in Education**, 2009-01-01 Michel Foucault's concept of governmentality originated in a lecture series in the late 1970s at the Collège de France and soon became the basis for a range of historical and contemporary studies across the social sciences

and humanities The concept in part rests on a simple but powerful idea that links government to the freedom of the subject in a novel understanding of liberal politics It also provides an analytics of power based on the examination of actual practices This is the first collection to use Foucault's concept in relation to the field of education where it has a natural home given that much educational theory and practice in the liberal tradition at least since Kant has been directed at the goals of autonomy and self government The volume has three sections a general section on Foucault and governmentality with contributions from some of the world's leading scholars in the area including Colin Gordon Jacques Donzelot and Thomas Lemke and two sections devoted to governmentality and education the first outlining Anglo American perspectives the second focusing on European perspectives with contributions from leading scholars such as Tom Popkewitz James Marshall Tom Osborne Michael Peters Mark Olssen Tina Besley Hermann J Forneck Bernadette Baker Susan Weber Susanne Maurer Linda Graham and Maarten Simons and Jan Masschelein among many others Assessment that Informs Practice ,2000

ENC Focus ,2000 Language Testing and Assessment: Practices and Challenges in the 21st Century Dr. Henry Hartono, Despite the fact that language assessment has become one of the most crucial aspects of language teaching there have been many challenges faced by teachers and language test designers New challenges include online language classroom assessment and language assessment for class teachers who use English as the medium of instruction EMI The time of covid 19 pandemic will not stop the increased need for language assessment Therefore issues in language testing and assessment are worth to be well documented through academic articles **Setting Knowledge Free: The Journal of Issues in Informing Science and Information Technology Volume 5, 2008** Eli Cohen, *Resources in Education* ,1998

Beyond Outcomes Richard Haswell, 2001-05-30 Writing assessment programs help place entering and mid career students in composition courses at the appropriate level monitor the progress of those students and assist in placing them in writing courses throughout their undergraduate careers These same universities also have writing instruction programs which might include writing centers writing across the curriculum initiatives and freshman and advanced composition programs At many institutions though writing assessment is not necessarily considered fundamental to writing instruction and there is little communication between the assessment program and the composition program This book demonstrates that writing assessment and instruction programs may be successfully integrated The contributors analyze the development of the writing assessment and instruction program at Washington State University which is nationally recognized for its success In doing so they provide guidance to other institutions planning to develop similar integrated programs The volume argues that writing assessment and instruction should inform and influence each other that they should evolve together and that they should be developed locally By tracing the success of the WSU program the authors directly challenge the use of national packaged assessment programs such as standardized placement tests **Beyond the Classroom** Rev.
