influence visual forms How does materiality affect the generativity of forms On the forces within the images the book addresses the philosophical thought of Gilles Deleuze and Ren Thom as well as the experiment of Aby Warburg s Atlas Mnemosyne The theories discussed in the book are tested on a variety of corpora for analysis including both paintings and photographs taken from traditional as well as contemporary sources in a variety of social sectors arts and sciences Finally semiotic methodology is contrasted with the computational analysis of large collections of images Big Data such as the Media Visualization analyses proposed by Lev Manovich and Cultural Analytics in the field of Computer Science to evaluate the impact of automatic analysis of visual forms on Digital Art History and more generally on the image sciences
