Raeseide, 2009-09-29 By 1910 the Antarctic was the last place on earth that had never been explored and British naval officer Robert Scott was obsessed that an Englishman specifically himself should conquer the pole Despite being under funded under equipped and unprepared Scott sailed south in the antiquated whaling ship Terra Nova in what everyone assumed would be a cracking good adventure The expedition was made up entirely of British adventurers gadabouts and scientists the exception being one Canadian Charles Seymour Silas Wright Born 1887 in Toronto Charles Wright was studying physics in

Cambridge when he heard Scott was looking for a physicist to join the expedition to the pole By the time Wright inquired Scott had chosen a physicist for the team but was short a glaciologist Who else but a Canadian would know about glaciers Wright became the expedition s glaciologist Halfway through the rough passage to the Antarctic Scott got word that a rival explorer Norwegian Roald Amundsen was also making a run for the pole and was close on their heels What started out as a stroll to the South Pole became a race between two very determined and different men Arriving at their base camp on Cape Evans in January 1911 Scott s team soon discovered they were unprepared for the Antarctic while equipment failures and food shortages compounded the hardship For the final race to the pole Scott stripped the team down to four men and Wright did not make the cut Scott reached the geographic South Pole only to find that Amundsen had beaten them by days Bitterly disappointed Scott and his companions returned to base camp but were caught in a fierce Antarctic blizzard that raged for days Too weak to pull their sleds and out of food and fuel they froze to death Ironically as if to underscore the litany of errors that dogged the expedition they perished only a few miles from a cache of food and fuel Next spring Wright led a search party to look for the remains of Scott and his party and it was the sharp eyed Wright who spotted a small patch of green on a snowy landscape the tent containing Scott and his companions frozen bodies Wright returned to England and went on to do even more extraordinary things including inventing trench wireless in WWI and working closely with Winston Churchill developing the technology to assist in the allied invasion of Europe in WWII which included developing the first radar installations and inventing the technology that neutralized German magnetic sea mines After a stint as naval attach to Washington D C and Director of Scripps Oceanographic institute in La Jolla California he retired to Salt Spring Island BC passing away in 1975 Typically Canadian Wright was modest about his accomplishments with few Canadians aware of his amazing life and the extraordinary impact he had on the 20th century

**Deathscapes** James D. Sidaway, 2016-05-13 Death is at once a universal and everyday but also an extraordinary experience in the lives of those affected Death and bereavement are thereby intensified at and frequently contained within certain sites and regulated spaces such as the hospital the cemetery and the mortuary However death also affects and unfolds in many other spaces the home public spaces and places of worship sites of accident tragedy and violence Such spaces or Deathscapes are intensely private and personal places while often simultaneously being shared collective sites of experience and remembrance each place mediated through the intersections of emotion body belief culture society and the state Bringing together geographers sociologists anthropologists cultural studies academics and historians among others this book focuses on the relationships between space place and death bereavement in western societies Addressing three broad themes the place of death the place of final disposition and spaces of remembrance and representation the chapters reflect a variety of scales ranging from the mapping of bereavement on the individual or in private domestic space through to sites of accident battle burial cremation and remembrance in public space The book also examines social and cultural changes in death and bereavement practices including personalisation and

secularisation Other social trends are addressed by chapters on green and garden burial negotiating emotion in public private space remembrance of violence and disaster and virtual space A meshing of material and more than representational approaches consider the nature culture economy and politics of Deathscapes what are in effect some of the most significant places in human society     **The Book of Ice** DJ Spooky That Subliminal Kid,2011 In light of climate change and humanitys increasingly complex and nuanced relationship with the natural world this book serves as an accessible point of entry into complex ideas Miller uses Antarctica as a point on entry for contemplating humanitys relationship with the natural world
