Character Portraits of England's Germanic Monarchs 1659-20-- A.D. Chris Stubbs, 2015-11-12
Continuing from where we left off in the previous book we have assembled the Character Portraits of the Hanoverian and Saxe Coburg and Gotha monarchs of England from 1659-20 A D As before these portraits have been constructed by following the authors proposed and previously described method for sorting combining and blending interpretations of specific indicators from each of the monarchs epoch and birth charts Please note that none of the interpretations have come from the author All points from the interpretations have been included but duplication has been minimized Importantly the unpolished portraits are impartial and consist of relatively modern expressions for appreciation and comparison purposes but the most speculative the more mundane and the least relevant interpretations have been relegated to smaller print However the order throughout the portraits remains unchanged Additionally all the natal charts together with corresponding comments thereon have been assembled chronologically in appendix 1 In case of interest appendix 2 contains the natal charts of some of those who came close to becoming Englands monarchs within the time frame of the book Finally appendix 3 examines the natal charts of the Hanoverian monarchs and of the Saxe Coburg and Gotha monarchs as separate groups to try to identify specific hereditary traits among them Because the author feels that all the portraits from this and from the previous two books fit all the rulers well and specifically he is tempted to conclude that for all of us Character Portraits should be able to provide us with guidance firstly as young adults and secondly as parents soon after a child is born

Portrait of England Christian Mawson, 1942

The Elements of Life Richard Wendorf, 1990 In this bold new study Wendorf compares two arts biography and portrait painting that have often been linked in a casual way but whose historical connections have remained unexplored Reassessing the great age of English portraiture from the arrival of Van Dyck to the publication of Boswell s *Life of Johnson* Wendorf reveals that despite their obvious differences visual and verbal portraits often shared similar assumptions about the representation of historical character Rooted in modern theory devoted to the comparison of literature and painting and to the problem of representation the book examines each form of portraiture in terms of the other bringing into discussion such writers as Izaak Walton John Evelyn John Aubrey Roger North Goldsmith Johnson Mrs Piozzi Boswell and such artists as Van Dyck Lely Samuel Cooper Jonathan Richardson Hogarth and Reynolds

Concise Character Portraits Of England's Tudor, Stuart and Protectorate Rulers: 1456-1714 A . D . Chris Stubbs, 2014-03-05 This book presents character portraits of Tudor Stuart and Protectorate rulers of England from AD 1456 to 1714 The author derived the

portraits following a previously described method by sorting and blending interpretations from each ruler's epoch and birth charts Please note that none of the interpretations are the author's that he has included all points obtained but that he has minimised duplication The unpolished portraits generated are impartial free from bias and consist of relatively modern expressions for appreciation and comparison purposes Concise has been added to the title because the most speculative the more mundane and the least relevant interpretations have been relegated to smaller print but the order throughout each portrait remains unchanged Additionally Appendix 1 collects all the natal charts and comments on them In case of further interest Appendix 2 assembles the natal charts of some of England's nearly rulers during the time frame of the book Finally Appendix 3 examines the Tudors and Stuarts separately to try and find group heredity traits among them The results obtained also start to support the idea that importantly we are members of the solar system even though naturally we are Earthlings first

Portraits, Painters, and Publics in Provincial England 1540-1640 Robert Tittler, 2013-09-05 In this the first comprehensive study of post Reformation provincial English portraiture Robert Tittler investigates the growing affinity for secular portraiture in Tudor and early Stuart England a cultural and social phenomenon which can be said to have produced a public for that genre He breaks new ground in placing portrait patronage and production in this era in the broad social and cultural context of post Reformation England and in distinguishing between native English provincial portraiture which was often highly vernacular and foreign influenced portraiture of the court and metropolis which tended towards the formal and polite Tittler describes the burgeoning public for portraiture of this era as more than the familiar court and London based presence but rather as a phenomenon which was surprisingly widespread both socially and geographically throughout the realm He suggests that provincial portraiture differed from the mainstream cosmopolitan portraiture of the day in its workmanship materials inspirations and even vocabulary showing how its native English roots continued to guide its production Innovative chapters consider the aims and vocabulary of English provincial portraiture the relationship of portraiture and heraldry the painter's occupation in provincial as opposed to metropolitan England and the contrasting availability of materials and training in both provincial and metropolitan areas The work as a whole contributes to both art history and social history it speaks to admirers and collectors of painting as well as to curators and academics
