story of intellectual debates with the international history of the twentieth century Gleason traces the birth of the term to Italy in the first years of Mussolini's rule Created by Mussolini's enemies the word was appropriated by the Fascists themselves to describe their program in what turned out to be one of the less totalitarian of the European dictatorships He follows the growth and expansion of the concept as it was picked up in the West and applied to Hitler's Germany and the Soviet Union Gleason's account takes us through the debates of the early postwar years as academics in turn adopted the term notably Hannah Arendt The idea of totalitarianism came to possess novelists such as Arthur Koestler *Darkness at Noon* and George Orwell whose *Nineteen Eighty Four* was interpreted by conservatives as an attack on socialism in general and subsequently suffered criticism from left leaning critics The concept fully entered the public consciousness with the opening of the Cold War as Truman used the rhetoric of totalitarianism to sell the Truman Doctrine to Congress Gleason takes a fascinating look at the notorious brainwashing episodes of the Korean War which convinced Americans that Communist China too was a totalitarian state As he takes his account through to the 1990s he offers an inner history of the Cold War revealing the political charge the term carried for writers on both the left and right He also explores the intellectual struggles that swirled around the idea in France Germany Italy Czechoslovakia and Poland When the Cold War drew to a close in the late 1980s Gleason writes the concept lost much of its importance in the West even as it flourished in Russia where writers began to describe their own collapsing state as totalitarian though left wing Western thinkers had long resisted doing so Abbott Gleason is a leading scholar of Soviet and Russian history and a contributor to periodicals ranging from *The Russian Review* to *The Atlantic Monthly* In this stimulating intellectual history he offers a revealing look at one of the central concepts of modern times *From Benito Mussolini to Hugo Chavez* Paul Hollander, 2017-01-05 During the twentieth and twenty first centuries political dictators were not only popular in their own countries but were also admired by numerous highly educated and idealistic Western intellectuals The objects of this political hero worship included Benito Mussolini Adolph Hitler Joseph Stalin Mao Zedong Fidel Castro and more recently Hugo Chavez among others This book seeks to understand the sources of these misjudgements and misperceptions the specific appeals of particular dictators and the part played by their charisma or pseudo charisma It sheds new light not only on the political disposition of numerous Western intellectuals such as Martin Heidegger Eric Hobsbawm Norman Mailer Ezra Pound Susan Sontag and George Bernard Shaw but also on the personality of those political leaders who encouraged and in some instances helped to design the cult surrounding their rise to dictatorship *China* John King Fairbank, Merle Goldman, 2006-04-30 John King Fairbank was the West's doyen on China and this book is the full and final expression of his lifelong engagement with this vast ancient civilization The distinguished historian Merle Goldman brings the book up to date and provides an epilogue discussing the changes in contemporary China that will shape the nation in the years to come [The Fascist Persuasion in Radical Politics](#) A. James Gregor, 2015-03-08 How valid are the assertions of contemporary radicals who insist that they are Marxists A James

Gregor measures the distance that separates today's radicals from the belief system of Marx and Engels. He finds that the characteristic qualities of modern mass mobilizing movements bear more impressive similarities to the paradigmatic Fascism of Benito Mussolini than to classical Marxism. Thus he offers a new conceptual framework for the analysis of contemporary totalitarian movements and established regimes. China's Dream Kerry Brown, 2018-10-29 The Communist Party of China (CPC) is one of the great political forces of modern times. In charge of the destiny of a fifth of humanity, it survives despite the collapse of similar systems elsewhere. Few, however, understand the sources of this resilience or, for that matter, what the Party itself stands for. China's Dream is the first book to explore the Communist Party as a cultural rather than a political entity. It looks at the narratives the Party has created to recount its own history with the moral story about national rejuvenation and renaissance that these encode. It does not shy away from the thorny issue of how a Party under Mao Zedong, one associated with self-sacrifice, collectivist effort, and anti-individualism, came to pragmatically embrace market capitalism and a new ethics. The tensions to which this gives rise have resulted in a crisis of values, which is now being addressed with very mixed results by the CPC. Drawing on his extensive knowledge of contemporary China, Kerry Brown takes us on a unique and fascinating journey through the least understood aspect of China today: not the great economic revolution in the material world but the deep cultural revolution already underway in Chinese people's daily lives.
