Home Security Systems Kms Publishing.com,2009-12-01 In the USA alone home crimes relating to burglary rose to an alarming 2 Million in the last year 2 out of 3 criminals broke into homes through a door 1 out of 3 intruders force an entry by means of a window If these statistics don't bother you you're obviously unconcerned about home safety and the safety of your family When we talk of home security it is all encompassing We mean your personal safety and the safety of your house the family the possessions and the neighborhood This book contains time tested full proof safety precautions for superior home security We give out dependable guidelines of securing your home whether you are in residence or away on vacation Study easy to follow safety tips and habits to tighten your home security Learn about common safety mistakes you might not be aware you are doing or already exist in your home Discover crucial safety tools and strategies to assist you in keeping your home and neighborhood safe from break ins Learn how much a superior home security system is supposed to cost you Find out how to select a reputable security company provider The book also covers details on safety precautions for the home apartments condominiums as well as other types of residences How insurance coverage can protect your home and personal belongings Plus a whole lot more helpful information for home safety check and break in prevention Ensure the safety of your home and family *Sexuality and the Politics of Violence and Safety* Les Moran,Beverley Skeggs,2014-02-04 *Sexuality and the Politics of Violence* offers a timely and critical exploration of issues of safety and security at the centre of responses to violence Through a multi disciplinary analysis drawing on feminism lesbian and gay studies sociology cultural geography criminology and critical legal scholarship the book offers to transform the way we understand and respond to the challenges raised by violence It breaks new ground in its examination of the rhetoric and politics of violence property home cosmopolitanism and stranger danger in the generation of safety and security Using interviews focus groups and surveys with lesbians and gay men *Sexuality and the Politics of Violence* draws upon real life experiences of safety and security It raises some fundamental challenges to the law and order politics of existing scholarship and activism on homophobic hate crime *An Integrated Approach to Home Security and Safety Systems* Sonali Goyal,Neera Batra,N. K. Batra,2021-10-14 This book provides an integrated solution for security and safety in the home covering both assistance in health monitoring and safety from strangers intruders who want to enter the home with harmful intentions It defines a system whereby recognition of a person stranger at the door is done using three modules Face Recognition Voice Recognition and Similarity Index These three modules are taken together to provide a percentage likelihood that the individual is in the known or unknown category The system can also continuously monitor the health parameters of a vulnerable person living alone at home and aid them in calling for help in an emergency The authors have analyzed a number of existing biometric techniques to provide security for an individual living alone at home These biometric techniques have been tested using MATLAB image

processing and signal processing toolboxes and results have been calculated on the basis of recognition rate. A major contribution in providing security is a hybrid algorithm proposed by the author named PICA which combines features of both PCA Principle Component Analysis and ICA Independent Component Analysis algorithms. This hybrid approach gives better performance recognition than either system alone. The second proposed hybrid algorithm for voice recognition is named as a MFRSTA algorithm by combining features of MFCC Mel Frequency Cepstral Coefficient and RSTA PLP RelAtive SpecTrA Perceptual Linear Prediction algorithm. After performing experiments results are collected on the basis of recognition rate. The authors have also proposed a third technique named as a Similarity Index to provide trust based security for an individual. This technique is text independent in which a person is recognized by pronunciation frequency tone pitch etc irrespective of the content spoken by the person. By combining these three techniques a high recognition rate is provided to the person at the door and high security to the individual living independently at home. In the final contribution the authors have proposed a fingertip based application for health monitoring by using the concept of sensors. This application is developed using iPhone 6 s camera. When a person puts their fingertip on a camera lens with the help of brightness of the skin the person s heartbeat will be monitored. This is possible even with a low quality camera. In case of any emergency text messages will be sent to the family members of the individual living alone by using 3G Dongle and MATLAB tool. Results show that the proposed work outperforms all the existing techniques used in face recognition voice recognition and health monitoring alone.
