Seeing Eye Hermeneutical Phenomenology In The Study Of Religion:

The Seeing Eye Walter L. Brenneeman, Stanley O. Yarian, Alan M. Olson, 1982 Establishing a link between phenomenology and hermeneutics as seen by philosophers notably Heidegger and Husserl and as applied by students of religion notably Eliade and van der Leeuw is the pioneering aim of this book No existing book ties together the cross disciplinary strands in a way that is useful for religious studies A phenomenological and therefore hermeneutical approach to religion prides itself on being aware of its own presuppositions and those of others that are brought to bear on data to be interpreted Thus it seeks to gain an access to the religious worlds of other peoples in as pure a form as possible Phenomenological hermeneutics differs from the traditional comparative study of religion in an important way the new method attempts an empathic understanding of religious experiences before making any comparisons or drawing any inferences Part I shows how the phenomenological approach must arise from a crisis of doubt within the prevailing tradition It goes on to compare this approach to the mystics understanding of the scope and limitations of rational consciousness contrasting it with the nominalists dichotomy between faith and reason Part II starts with Eliade s creative hermeneutics which holds that an object or an act becomes real only insofar as it imitates or repeats an archetype particularly the archetype of the sacred It goes on to develop Cassirer s point that myth is a particular way of seeing Part III starts by showing how art like religion is an imitation of an archetype It goes on to apply hermeneutical phenomenology to the interpretation of ritual Ritual gesture Chapter 6 argues thematizes the world establishing a mystical symbolic relationship between body and world the seen and the unseen Part III continues with a critique of the writings of Carlos Castaneda arguing that these contain the symbolic elements of both archaic shamanism and classical mysticism The final chapter treats the three tiered cosmos that is universal in folklore the tier of family home land artifacts the tier of clan tribe nation and the tier of weather seasons natural forces Each tier has its loric power and these powers are united by shamans and mystics in one sacred kingdom of power

Aesthetics and Analysis in Writing on Religion Daniel Gold, 2003-06-10 This book addresses a fundamental dilemma in religious studies Exploring the tension between humanistic and social scientific approaches to thinking and writing about religion Daniel Gold develops a line of argument that begins with the aesthetics of academic writing in the field He shows that successful writers on religion employ characteristic aesthetic strategies in communicating their visions of human truths Gold examines these strategies with regard to epistemology and to the study of religion as a collective endeavor

A Pragmatist Philosophy of Life in Ortega Y Gasset John Thomas Graham, 1994 Over ten years in preparation A Pragmatist Philosophy of Life in Ortega y Gasset reveals how open adaptable and inventive was pragmatism as Ortega elaborated its philosophical implications and applications for Spain Europe and the Americas It is based on extensive use of

Interpreting Masonic Ritual Oscar Patterson III,2016-11-28 Interpreting Masonic Ritual endeavors to address the depth of the ritualistic experience through a discussion of what ritual means to man as well as what man means to ritual. Ritual teaches us about reality but we will not come to a full understanding of it if we disparage what others do and view their actions from a position of pseudo intellectual or cultural superiority. Ritual is the core of Freemasonry and is that thing which sets it apart from so many organizations. It is the key to the Freemason's secrets and the manner through which they transmit our beautiful system of morality. It is something to be treasured, maintained, taught, elevated, evaluated, and above reinforced through proper performance, decorum, and setting. [Ways of Living Religion](#) Christina M.

Muslims as Actors Jacques Waardenburg,2012-02-13 This book deals with Islamic studies and with the question how the scholarly study of religion can contribute to the study of Islam. The author advocates studying Islamic phenomena as signs and symbols interpreted and applied in diverse ways in existing traditions. He stresses the role of Muslims as actors in the ongoing debate about the articulation of Islamic ways of life and construction of Islam as a religion. A careful study of this debate should steer clear of political, religious, and ideological interests. Research in this area by Muslims and non-Muslim scholars alike should address the question of what Muslims have made of their Islam in specific circumstances. Current political contexts have created an unhealthy climate for pursuing an open approach to Islam based on reading, observing, listening, and reflecting. Yet precisely nowadays we need to look anew at ways of Muslim thinking and acting that refer to Islam and to avoid certain schemes of interpreting Muslim realities that are no longer adequate for present-day Muslim life situations. Muslim recourse to Islam can be studied as human constructions of value and meaning and relations between Muslims and others can be seen in terms of human interaction without blame always falling on Islam as such.

Dwelling, Place and Environment David Seamon,Robert Mugerauer,2012-12-06 themes among the essays resurface and resonate. Though our request for essays was broad and open-ended we found that topics such as seeing, authenticity, interpretation, wholeness, care, and dwelling ran as undercurrents throughout. Our major hope is that each essay plays a part in revealing a larger whole of meaning which says much about a more humane relationship with places, environments, and the earth as our home. Part I: Beginnings and directions. At the start we recognize the tremendous debt this volume owes to philosopher Martin Heidegger (1889-1976) whose ontological excavations into the nature of human existence and meaning provide the philosophical foundations for many of the essays, particularly those in Part I of the volume. Above all else Heidegger was regarded by his students and colleagues as a master teacher. He not only thought deeply but was also

able to show others how to think and to question Since he perhaps more than anyone else in this century provides the instruction for doing a phenomenology and hermeneutic of humanity's existential situation he is seminal for phenomenological and hermeneutical research in the environmental disciplines He presents in his writings what conventional scholarly work especially the scientific approach lacks he helps us to evoke and understand things through a method that allows them to come forth as they are he provides a new way to speak about and care for our human nature and environment
