Seeing Through Photographs:

Seeing Through Photographs Michael Hiley, 1983 Philosophy of Film and Motion Pictures Noël Carroll, Jinhee Choi, 2009-02-09 Designed for classroom use this authoritative anthology presents key selections from the best contemporary work in philosophy of film. The featured essays have been specially chosen for their clarity, philosophical depth, and consonance with the current movement towards cognitive film theory. Eight sections with introductions cover topics such as the nature of film, film as art, documentary cinema, narration and emotion in film, film criticism, and film's relation to knowledge and morality. Issues addressed include the objectivity of documentary films, fear of movie monsters, and moral questions surrounding the viewing of pornography. Replete with examples and discussion of moving pictures throughout. **On Photography** Diarmuid Costello, 2017-09-22 What is photography? Is it a source of knowledge or an art? Many have said the former because it records the world automatically; others the latter because it expresses human subjectivity. Can photography be both or must we choose? In *On Photography: A Philosophical Inquiry*, Diarmuid Costello examines these fascinating questions and more, drawing on images by Alfred Stieglitz, Berenice Abbott, Paul Strand, Lee Friedlander, James Welling, and Wolfgang Tillmans, among others, and the writings of Elizabeth Eastlake, Peter Henry Emerson, Edward Weston, Siegfried Kracauer, André Bazin, and Stanley Cavell. This sets the scene for the contemporary stand-off between sceptical and non-sceptical Orthodoxy in the work of Roger Scruton and Kendall Walton, and a New Theory of Photography taking its cue from László Moholy-Nagy and Patrick Maynard. Written in a clear and engaging style, *On Photography* is essential reading for anyone interested in the philosophy of photography, aesthetics, art, and visual studies. **Marvelous Images** Kendall Walton, 2008-04-23 The twelve essays by Kendall Walton in this volume address a broad range of theoretical issues concerning the arts. Many of them apply to the arts generally—to literature, theater, film, music, and the visual arts—but several focus primarily on pictorial representation or photography. In *How Marvelous: Toward a Theory of Aesthetic Value*, Walton introduces an innovative account of aesthetic value, and in this and other essays he explores relations between aesthetic value and values of other kinds, especially moral values. Two of the essays take on what has come to be called imaginative resistance, a cluster of puzzles that arise when works of fiction ask us to imagine or to accept as true in a fiction moral propositions that we find reprehensible in real life. *Transparent Pictures*: Walton's classic and controversial account of what is special about photographic pictures is included, along with a new essay on a curious but rarely noticed feature of photographs and other still pictures: the fact that a depiction of a momentary state of an object in motion allows viewers to observe that state in imagination for an extended period of time. Two older essays round out the collection: another classic, *Categories of Art*, and a less well-known essay, *Style and the Products and Processes of Art*, which examines the role of appreciators' impressions of how a work of art came about in understanding and appreciation. None of the reprinted essays is abridged, and new postscripts have been added to several of them. Arguing About Art Alex Neill, Aaron Ridley, 2013-02-01 Offering a unique debate format, the third edition of the

bestselling *Arguing About Art* is ideal for newcomers to aesthetics or philosophy of art. This lively collection presents an extensive range of short clear introductions to each of the discussions which include sentimentality appreciation interpretation understanding objectivity nature food horror. historians alike *Understanding Pictures* Dominic Lopes,1996-03-28 There is not one but many ways to picture the world Australian x ray pictures cubist collages Amerindian split style figures and pictures in two point perspective each draw attention to different features of what they represent The premise of *Understanding Pictures* is that this diversity is the central fact with which a theory of figurative pictures must reckon Lopes argues that identifying pictures subjects is akin to recognizing objects whose appearances have changed over time He develops a schema for categorizing the different ways pictures represent the different kinds of meaning they have and he contends that depiction's epistemic value lies in its representational diversity He also offers a novel account of the phenomenology of pictorial experience comparing pictures to visual prostheses like mirrors and binoculars The book concludes with a discussion of works of art which have made pictorial meaning their theme demonstrating the importance of the issues this book raises for understanding the aesthetics of pictures
