Seeing the Lions Robert F. Walton, Midwestern State University (Wichita Falls, Tex.). Department of English, 1989-02-01

When the Last Lion Roars Sara Evans, 2018-06-14 The illegal killing of Cecil a famous and magnificent black maned Zimbabwean lion by an American big game hunter in 2015 sparked international outrage More significantly it drew the world's attention to the devastating plight of Africa's lions A century ago there were more than 200 000 wild lions living in Africa Today with that population reduced by more than 90 per cent many experts believe that without effective conservation plans Africa's remaining wild lions could be completely wiped out by the mid half of this century When the Last Lion Roars explores the historic rise and fall of the lion as a global species and examines the reasons behind its catastrophic decline Interwoven with vivid personal encounters of Africa's last lions Sara Evans questions what is being done to reverse or at least stem this population collapse and she considers the importance of human responsibility in this decline and more crucially in their conservation From the Lion Guardians in Kenya to the Living Walls of Tanzania and the Hwange Lion Research Project in Zimbabwe Sara meets both lions and their champions people who are fighting to bring this iconic species back from the brink of extinction

Humans and Lions Keith Somerville, 2019-07-10 This book places lion conservation and the relationship between people and lions both in historical context and in the context of the contemporary politics of conservation in Africa The killing of Cecil the Lion in July 2015 brought such issues to the public's attention Were lions threatened in the wild and what was the best form of conservation How best can lions be saved from extinction in the wild in Africa amid rural poverty precarious livelihoods for local communities and an expanding human population This book traces man's relationship with lions through history from hominids to the Romans through colonial occupation and independence to the present day It concludes with an examination of the current crisis of conservation and the conflict between Western animal welfare concepts and sustainable development thrown into sharp focus by the killing of Cecil the lion Through this historical account Keith Somerville provides a coherent evidence based assessment of current human lion relations providing context to the present situation This book will be of interest to students and scholars of environmental and African history wildlife conservation environmental management and political ecology as well as the general reader

Stephen Farmer,1896 My Lion's Heart Gareth Patterson,2014-09-15 Environmentalist independent researcher and author Gareth Patterson has spent his entire adult life working tirelessly for the greater protection of African wildlife and more particularly for that of the lion Born in England in 1963 Gareth grew up in Nigeria and Malawi From an early age he knew where his life s path would take him it would be in Africa and his life s work would be for the cause of the African wilderness and its wild inhabitants His is an all encompassing African story From his childhood in West and East Africa to his

study of a threatened lion population in a private reserve in Botswana to his work with George Adamson celebrated as the Lion Man of Africa we witness Gareth's growing commitment to his life's mission This is nowhere more evident than in his account of his life as a human member of a lion pride experiencing life and death through its eyes as he successfully rehabilitated three famous orphaned lion cubs back into a life in the wilds At considerable risk to his own personal safety he exposed the sordid canned lion industry in South Africa bringing this shameful practice to international attention After moving to the Western Cape he took up the fight for the African elephant notably the unique endangered Knysna population and published his astonishing findings in his 2009 book *The Secret Elephants* Perhaps unsurprisingly given the stressful nature of his work Gareth suffered a massive physical and mental breakdown in his forties which he discusses here for the first time with an openness that underlines his courage Lesser men might have been broken but his lion's heart fought back and he ultimately overcame his illness Gareth Patterson's long awaited autobiography is a moving account of one man's single minded dedication to the preservation of Africa's wildlife It is also a stark reminder that if the human race does not want to lose Africa's priceless wild heritage there is no time to waste The lion is my totem animal and this is the story of my life in Africa for the lion
