Seen And Unseen A Biologist Views Of The Universe:

Seen and Unseen Edward McCrady, 1990 Walker Percy novelist physician says of Edward McCrady's SEEN UNSEEN His approach to a recalculation of science is decidedly unfashionable sorely needed quite fascinating While many scientists agree our material order originated in a big bang millions of years ago those same scientists are not necessarily willing to discern a creator behind that big bang McCrady embryologist college professor takes the idea of creation seriously pursuing its implications Creation implies a creator McCrady asks whether we can come to know something concrete about that creator by looking at the handiwork we call the universe Many thinkers have pursued similar arguments regarding order What sets McCrady's discussion apart is the tantalizing suggestion that we possess clues concerning where the order of human evolution is leading us Whether one takes his conclusions as poetic meditations of a scientist who also happens to be a Christian or whether one takes the conclusions as genuine possibilities will be determined by one's perspective SEEN UNSEEN A BIOLOGIST VIEWS THE UNIVERSE gives an intimate glimpse of a scientist's sincerest probings during the period twentieth century science called to question some of humanity's fondest assumptions regarding its origin destination

Bowler, 2014-04 Although much has been written about the vigorous debates over science and religion in the Victorian era little attention has been paid to their continuing importance in early twentieth century Britain Reconciling Science and Religion provides a comprehensive survey of the interplay between British science and religion from the late nineteenth century to World War II Peter J Bowler argues that unlike the United States where a strong fundamentalist opposition to evolutionism developed in the 1920s most famously expressed in the Scopes monkey trial of 1925 in Britain there was a concerted effort to reconcile science and religion Intellectually conservative scientists

championed the reconciliation and were supported by liberal theologians in the Free Churches and the Church of England especially the Anglican Modernists Popular writers such as Julian Huxley and George Bernard Shaw sought to create a non Christian religion similar in some respects to the Modernist position Younger scientists and secularists including Rationalists such as H G Wells and the Marxists tended to oppose these efforts as did conservative Christians who saw the liberal position as a betrayal of the true spirit of their religion With the increased social tensions of the 1930s as the churches moved toward a neo orthodoxy unfriendly to natural theology and biologists adopted the Modern Synthesis of genetics and evolutionary theory the proposed reconciliation fell apart Because the tensions between science and religion and efforts at reconciling the two are still very much with us today Bowler s book will be important for everyone interested in these issues Subject
