Marijuana Effects On Human Behavior:

Marijuana Loren L. Miller, 2013-10-22 Marijuana Effects on Human Behavior attempts to synthesize much of the existing experimentation concerning the acute and chronic effects of marijuana and its derivatives on human behavior. The book opens with a chapter on the strategies for conducting research on marijuana. It also describes a clinical study at the University of British Columbia. The next chapter discusses the issues that have beclouded the question of legalization of marijuana in the United States. This is followed by separate chapters on the effects of marijuana on motor and mental performance, marijuana memory research, a model of attention which can be used to describe the effects of marijuana use on cognition, and the effects of marijuana on neuropsychological functioning and learning. Subsequent chapters examine the behavioral actions of cannabis in man, compare the behavioral actions of cannabinoids in humans with those found in infrahumans, with special reference to acquisition and retention processes, timing, behavior state dependent learning, and attention, and investigate the long term effects of cannabis use. **Marijuana; Effects on Human Behavior** Loren L.

Miller, 1974 Marihuana Biological Effects Gabriel G. Nahas, William D. M. Paton, 2013-10-22 Marihuana Biological Effects Analysis Metabolism Cellular Responses Reproduction and Brain contains the proceedings of the Satellite Symposium of the 7th International Congress of Pharmacology held at Paris on July 22-23, 1978. Organized into four parts, this book begins with a discussion on the quantification of cannabinoids and their metabolites in the body fluids and tissues. Part II describes the cannabinoids and cellular metabolism. Parts III and IV explain the effects of cannabis on reproduction and brain.

Dept. of Health, Education, and Welfare, 1976 Problem Behavior Theory and Adolescent Health Richard Jessor, 2017-03-31 This second volume of Richard Jessor's influential works applies his groundbreaking theory to illuminating the psychosocial determinants of adolescent health. Focusing on a range of both health-compromising and health-enhancing behaviors, including problem drinking, marijuana use, risky driving, and early sexual experience, as well as regular exercise and healthy diet, these writings advance understanding of the role of health behavior in adolescence and adolescent development. Chapters illustrate the relevance of the theory and of its interdisciplinary approach for research on behavioral health in adolescence and for the design of prevention/intervention programs to promote healthy development. In addition, the book's comparative studies of U.S. and Chinese youth reveal the generality of the theory across societal and national differences. Topics featured in this book include Alcohol use and problem drinking in adolescent health and development, Psychosocial research on marijuana use, Understanding early initiation of sexual intercourse in adolescence, Smoking behavior in adolescence and young adulthood, Developmental change in risky driving, Healthy eating and regular
