Handbook on Printing Technology (Offset, Flexo, Gravure, Screen, Digital, 3D Printing with Book Binding and CTP) 4th Revised Edition NIIR Board of Consultants & Engineers, 2019-03-12

Printing is a process for reproducing text and image typically with ink on paper using a printing press. It is often carried out as a large scale industrial process and is an essential part of publishing and transaction printing. Modern technology is radically changing the way publications are printed, inventoried and distributed. The printing technology market is growing due to technological proliferation along with increasing applications of commercial printing across end users. In India, the market for printing technology is at its nascent stage, however, it offers huge growth opportunities in the coming years. The major factors boosting the growth of the offset printing press market are the growth of the packaging industry across the globe, increasing demand in graphic applications, the wide range of application in various industries and industrialization. The 3D printing market is estimated to garner 8.6 billion in coming years. The global digital printing packaging market is expected to exceed more than US 40.02 billion by 2026 at a CAGR of 13.9%.
