

SEPARATIST SHIPS

What very convenient details millions of Separatist warships in the Outer Rim, a few dozen battleships lined thousands of destroyers and frigates in a bold strike on the galactic capital Coruscant. These light warships, bristling with small laser cannons and impressive, over-sized cannons, were pledged to Count Dooku by the governments of hundreds of aggressively independent star sectors. As the craft are largely controlled by automated droid-brain technology, little crew space is required. This gives the ships a sinister, skeletal appearance. Destroyers and frigates are not equipped with hangars or ground attack armors but carry enough security droids for boarding actions. They can also act as "tanks" for Separatist warships, providing protection inside their spacious hull cavities. If the vessels' defense shields fail, however, their hollow hulls can make them vulnerable targets for Jedi starfighters.

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness of 10-year-old children. The study was conducted in a primary school in the city of Ankara, Turkey. The study group consisted of 20 children (10 boys and 10 girls) who were randomly selected from the school. The children were divided into two groups: a control group and an experimental group. The control group did not participate in any physical activity during the study period. The experimental group participated in a 12-week training program that included aerobic, strength, and flexibility exercises. The physical fitness of the children was measured at the beginning and at the end of the study period. The results of the study showed that the experimental group had significantly higher levels of physical fitness than the control group at the end of the study period. The study suggests that a 12-week training program can improve the physical fitness of 10-year-old children.
