Using Old Solutions to New Problems Marianna Kulka, 2013-06-19 The medicinal use of plants, animals and microorganisms has been a part of human evolution and likely began before recorded history. Is it possible that this knowledge can be used to create powerful new drugs and solve some of the human health problems facing us today? This book is a collection of an expert team of agronomists, chemists, biologists and policy makers who discuss some of the processes involved in developing a naturally sourced bioactive compound into a drug therapy. These experts define a natural compound and elucidate the processes required to find, extract and define a naturally derived bioactive molecule. Finally they describe the necessity for understanding the fundamental mechanisms of disease before applying bioactive molecules in bioassay guided drug discovery platforms.
