 Maya Political Science Time Astronomy and the Cosmos Prudence M Rice proposed a new model of Maya political
 organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This
 fundamental connection between timekeeping and Maya political organization sparked Rice s interest in the origins of the
 two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In Maya Calendar
 Origins she presents a provocative new thesis about the origins and development of the calendrical system Integrating data
 from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars
 developed about a millennium earlier than commonly thought around 1200 BC as an outgrowth of observations of the natural
 phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica
 She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early
 rulers who could thereby claim control over supernatural cosmic forces Rice shows how time became materialized
 transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized
 becoming the foundation for societal order political legitimization and wealth Rice s research also sheds new light on the
 origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars She also
 explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the
 Maya the cosmovision and ideology incorporated into the calendrical systems **Cruising World** ,2000-01 Cruising
