 and Political Science a stunning new collection of essays edited by E Robert Statham Jr Vividly cataloging the decay of the
 moral and intellectual foundations of civic liberty the book portrays a generation of Americans alienated from institutions
 built on public philosophy The work exposes the failure of America s political scientists to acknowledge and understand this
 alarming crisis in the American body politic The distinguished contributors examine the evolution of public philosophy the
 inextricable relationship between politics and philosophy and the interplay between public philosophy the constitution
 natural law and government They reveal the dire threat to deliberative democracy and the fundamental order of
 constitutional society posed by public philosophy s waning power to refine cultivate and civilize The work is an indictment of
 a society which has discarded a way of life rooted in natural law democracy and the traditions of civility and is a denunciation
 of an educated elite that has divorced itself from the standards upon which public philosophy rests It is essential reading for
 philosophers and political and social scientists seeking to resurrect the standards of American public life **Eclectic**
