Women in the Seventeenth-Century Quaker Community Catie Gill, 2017-03-02 Focussing on Quaker pamphlet literature of the commonwealth and restoration period Catie Gill seeks to explore and explain women s presence as activists writers and subjects within the early Quaker movement *Women in the Seventeenth Century Quaker Community* draws on contemporary resources such as prophetic writing prison narratives petitions and deathbed testimonies to produce an account of women s involvement in the shaping of this religious movement The book reveals that far from being of marginal importance women were able to exploit the terms in which Quaker identity was constructed to create roles for themselves in public and in print that emphasised their engagement with Friends religious and political agenda Gill s evidence suggests that women were able to mobilise contemporary notions of femininity when pursuing active roles as prophets martyrs mothers and political activists The book s focus on collective Quaker identities which arises from its analysis of multiple authored texts is key to its claims that gender issues have to be considered when analysing the sect s emergent system of values and Gill assesses the representation of women in male authored texts in addition to female writers attitudes to agency A bibliography that for the first time lists men and women s involvement as contributors as well as authors to Quaker pamphlets provides a valuable resource for scholars of seventeenth century radicalism **Science and Society in Restoration England** Michael

The British Gentry, the Southern Planter, and the Northern Family Farmer James L. Huston, 2015-05-04 Drawing on the history of the British gentry to explain the contrasting sentiments of American small farmers and plantation owners James L. Huston s expansive analysis offers a new understanding of the socioeconomic factors that fueled sectionalism and ignited the American Civil War This groundbreaking study of agriculture s role in the war defies long held notions that northern industrialization and urbanization led to clashes between North and South Rather Huston argues that the ideological chasm between plantation owners in the South and family farmers in the North led to the political eruption of 1854-56 and the birth of a sectionalized party system Huston shows that over 70 percent of the northern population by far the dominant economic and social element had close ties to agriculture More invested in egalitarianism and

personal competency than in capitalism small farmers in the North operated under a free labor ideology that emphasized the ideals of independence and mastery over oneself The ideology of the plantation by contrast reflected the conservative ethos of the British aristocracy which was the product of immense landed inequality and the assertion of mastery over others By examining the dominant populations in northern and southern congressional districts Huston reveals that economic interests pitted the plantation South against the small farm North The northern shift toward Republicanism depended on farmers not industrialists While Democrats won the majority of northern farm congressional districts from 1842 to 1853 they suffered a major defection of these districts from 1854 to 1856 to the antislavery organizations that would soon coalesce into the Republican Party Utilizing extensive historical research and close examination of the voting patterns in congressional districts across the country James Huston provides a remarkable new context for the origins of the Civil War
