Notes on the Cultivation of Choral Music and the Oratorio Society of New York Henry Edward Krehbiel, 2016-12-27 From the INTRODUCTION IT is not the purpose of this little book to give a complete history of the singing societies of New York City That would be an unprofitable if not an impossible task I had designed originally to write only a sketch of the Society which now represents our highest attainment in choral culture Knowing however that an institution like the Oratorio Society could only be the outcome of many experiments in the past and that its peculiar features and the cause of its present success could only be understood and valued if viewed as the fruit of early experiences I addressed myself to a study of choral history in New York with the aim of bringing to the attention of the reader the influences which have been at work in the development of the present state of culture in this department of music I was the more willing to let the record of my observations and speculations crowd my original purpose into the background since I became more and more convinced as I went on that many others must have felt with me the need of some handy notes on choral culture It is one of the inexplicable things in the literature of music that we should be without a history of the rise and progress of amateur singing societies It would be difficult I am sure to point to another influence in the history of modern music so fruitful in results to the art itself as well as to its cultivators as that exercised by voluntary organizations of amateur choristers and its interest as a theme for discussion is greatly enhanced by the fact that the story is almost compassed by the present century and its elements might therefore be got together with comparative ease The cultivation of choral music in the phase in which it shows itself now in the great festivals of England Germany and America and in the concerts of such choirs as the Handel and Haydn Society of Boston the Oratorio Society of New York and the choir of the Musical Festival Association of Cincinnati is less than a hundred years old and a more exhaustive investigation than is possible here owing to the narrow limits of this book might flatter patriotic pride by discovering that American cities were quite as prompt as Berlin in giving it encouragement though it is true under far less favorable circumstances

Notes on the Cultivation of Choral Music and the Oratorio Society of New York (Classic Reprint) Henry Edward Krehbiel, 2017-06-26 Excerpt from Notes on the Cultivation of Choral Music and the Oratorio Society of New York The singing societies of Germany by their diffusion of knowledge concerning the master pieces of choral composition and their nurture of a warm interest in music were beyond question the most potent of the factors employed in the work of lifting that country to the eminence which it now occupies in music The composers of the Viennese School of the eighteenth century wrested the supremacy from Italy by the virtue that lay in the freshness vigor and richness of their creations these creations became the models for the succeeding generations and the composers became the musical law givers but for the cultivation of the national musical spirit which established the conservatories orchestras and choirs in

which artists were educated in a manner that enabled them to maintain its proud supremacy Germany rested in a great measure upon the impulse which went out from the crowning achievement of Fasch the accompanist at the Court of Frederick the Great of Prussia About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Teacher in Nineteenth Century New England Terese Volk Tuohey, 2015-12-17 There is a need for historical studies in music education that focuses on the common person. Historians in general have been doing this for years but music education history has yet to catch up to the field. Although there have been many biographies and biographical studies about the more well known music educators little has been done investigating what teaching was like for the average teacher and even less is known about teaching music in the early years of music education in the United States. *A Musician and Teacher in Nineteenth Century New England* Irving Emerson 1843-1903 argues that understanding history requires knowledge of the people who lived during the time. This book focuses on what Irving Emerson's life was like as a musician and music teacher during this early and critical period of music education. During this time in history the growth of music as a curricular study in the United States from singing schools to classroom singing and note reading paralleled Emerson's teaching career. It was because of the groundwork established by music teachers like Irving Emerson that the music curriculum developed in the twentieth century to include music appreciation, instrumental music ensembles and marching band along with general music classes and choral music education. This is an invaluable resource to music educators, musicians and historians alike in understanding the beginnings and formation of what is today music appreciation in the education system. **The Baton**, 1922. Includes music. **Source Readings in American Choral Music**, 1995.
