Korenjak,2023-09-20 During the early modern period the emergence of what ultimately became modern science took place mainly in Latin the international language of educated discourse of the era Hundreds of thousands of scientific texts were published in Latin from the invention of print around 1450 to the demise of Latin as a language of science around 1850 Despite its importance our knowledge of this literature is extremely limited This book aims to provide an overview of this area the first ever to be written It does so not from the perspective of a natural scientist or a historian of science but of a literary scholar Instead of the scientific content or methodology of the respective works it focusses on the genres of scientific literature and their communicative functions Latin Scientific Literature 1450 1850 falls into two main parts The first part Contexts introduces four aspects of early modern intellectual culture which are crucial for an understanding of the scientific literature of the time the development of science the role of Latin the concept of literature and the rise of print Part two Texts offers an overview of Neo Latin scientific literature Subsumed under five communicative functions disclosing sources presenting facts arguing for certain positions summarizing knowledge and publicizing science twenty pertinent genres are discussed

Vita nuova Petrarch's lyric sequence and Boccaccio's Decameron Barolini also looks at the cultural implications of the editorial history of Dante's rime and at what sparso versus organico spells in the Italian imaginary In the section on gender she argues that the didactic texts intended for women's use and instruction as explored by Guittone Dante and Boccaccio but not by Petrarch were more progressive than the courtly style for which the Italian tradition is celebrated Moving from the lyric origins of the Divine Comedy in Dante and the Lyric Past to Petrarch's regressive stance on gender in Notes toward a Gendered History of Italian Literature and encompassing among others Giacomo da Lentini Guido Cavalcanti and Guittone d'Arezzo these sixteen essays by one of our leading critics frame the literary culture of thirteenth and fourteenth century Italy in fresh illuminating ways that will prove useful and instructive to students and scholars alike Remembering in the Renaissance Kenneth Gouwens, 1998-04-12 An assessment of how four humanists in the court of Pope Clement VII Pietro Alcionio Pietro Corsi Jacopo Sadoletto and Pierio Valeriano interpreted the cataclysmic Sack of Rome 1527 which called into question their earlier images of the Renaissance papacy Building upon recent discussions in literary criticism and cognitive psychology the author elucidates how these humanists' narratives gave meaningful shape to their memories and in so doing helped to redefine the image of Renaissance Rome as it would be remembered by subsequent generations *The Practice and Representation of Reading in England* James Raven, Helen Small, Naomi Tadmor, 2007-09-27 Developments in cultural history and literary criticism have suggested alternative ways of addressing the interpretation of reading How did people read in the past Where and why did they read How were the manner and purpose of reading envisaged and recorded by contemporaries and why Drawing on fields as diverse as medieval pedagogy textual bibliography the history of science and social and literary history this collection of fourteen essays highlights both the singularity of personal reading experiences and the cultural conventions involved in reading and its perception An introductory essay offers an important critical assessment of the various contributions to the development of the subject in recent times This book constitutes a major addition to our understanding of the history of readers and reading **Forgotten Healers** Sharon T. Strocchia, 2019-12-17 Winner of the Margaret W. Rossiter History of Women in Science Prize A new history uncovers the crucial role women played in the great transformations of medical science and health care that accompanied the Italian Renaissance In Renaissance Italy women played a more central role in providing health care than historians have thus far acknowledged Women from all walks of life from household caregivers and nurses to nuns working as apothecaries drove the Italian medical economy In convent pharmacies pox hospitals girls' shelters and homes women were practitioners and purveyors of knowledge about health and healing making significant contributions to early modern medicine Sharon Strocchia offers a wealth of new evidence about how illness was diagnosed and treated whether by noblewomen living at court or poor nurses living in hospitals She finds that women expanded on their roles as health care providers by participating in empirical work and the development of scientific knowledge Nuns in particular were among the most prominent manufacturers and vendors of

pharmaceutical products Their experiments with materials and techniques added greatly to the era's understanding of medical care Thanks to their excellence in medicine urban Italian women had greater access to commerce than perhaps any other women in Europe Forgiven Healers provides a more accurate picture of the pursuit of health in Renaissance Italy More broadly by emphasizing that the frontlines of medical care are often found in the household and other spaces thought of as female Strocchia encourages us to rethink the history of medicine     **Mapping the Faerie Queene** Wayne
