## **Novel As Structure And Praxis:**

**The Novel as Structure and Praxis** Everett W. Knight, 1980-01-01     *A Theory of the Classical Novel* Everett Knight, 2016-08-05 First published in 1969 this book asserts that two concepts structure and praxis make it impractical for scholars to ignore the necessity of a theory of the novel with the term classical novel used to cover western fiction The author argues that the novel is fundamentally an enterprise an aspect of the praxis of a particular social class and that the ways of orthodox scholarship are also a praxis The investigator must enquire into the nature of their questions as those traditionally put to literature are inspired by irrelevant nineteenth century positivism In the author's view the book is necessarily a theory of the classical novel and a manifesto for the student movement     *Understanding Marxism* Geoff Boucher, 2014-09-03 Marxism as an intellectual movement has been one of the most important and fertile contributions to twentieth century thought No social theory or political philosophy today can be taken seriously unless it enters a dialogue not just with the legacy of Marx but also with the innovations and questions that spring from the movement that his work sparked Marxism Marx provided a revolutionary set of ideas about freedom politics and society As social and political conditions changed and new intellectual challenges to Marx's social philosophy arose the Marxist theorists sought to update his social theory rectify the sociological positions of historical materialism and respond to philosophical challenges with a Marxist reply This book provides an accessible introduction to Marxism by explaining each of the key concepts of Marxist politics and social theory The book is organized into three parts which explore the successive waves of change within Marxist theory and places these in historical context while the whole provides a clear and comprehensive account of Marxism as an intellectual system

**Neurodecolonisation in the Classroom** Remy Y.S. Low, 2025-08-18 This book extends on the scholarship on decolonising higher education by focusing on classroom pedagogies that can transform students embodied affects and habits as conditioned by coloniality It does so by offering a historical case study of how one exemplary educator Canadian activist and scholar Roxana Chu Yee Ng 1951-2013 drew on traditional Chinese medicine philosophy and Qigong practice to offer an embodied pedagogy that had profound effects on many of her students This book brings together scholarship from critical education contemplative pedagogy the neuroscience of stress mind body medicine and embodied cognition to make the case for the importance of embodied pedagogies in any project for decolonising higher education An innovative contribution to embodiment and decolonial studies this book will be of great interest to researchers and postgraduate students exploring interdisciplinary methods     *Praxis and Revolution* Eva von Redecker, 2021-08-24 The concept of revolution marks the ultimate horizon of modern politics It is instantiated by sites of both hope and horror Within progressive thought revolution often perpetuates entrenched philosophical problems a teleological philosophy of history economic reductionism and normative paternalism At a time of resurgent uprisings how can revolution be reconceptualized to grasp the dynamics of social transformation and disentangle revolutionary practice from authoritarian usurpation Eva von Redecker reconsiders

critical theory's understanding of radical change in order to offer a bold new account of how revolution occurs. She argues that revolutions are not singular events but extended processes beginning from the interstices of society, they succeed by gradually rearticulating social structures toward a new paradigm. Developing a theoretical account of social transformation, *Praxis and Revolution* incorporates a wide range of insights from the Frankfurt School to queer theory and intersectionality. Its revised materialism furnishes prefigurative politics with their social conditions and performative critique with its collective force. Von Redecker revisits the French Revolution to show how change arises from struggle in everyday social practice. She illustrates the argument through rich literary examples: a manage trois inside a prison, a radical knitting circle, a queer affinity group, and petitioners pleading with the executioner that forge a feminist open-ended model of revolution. *Praxis and Revolution* urges readers not only to understand revolutions differently but also to situate them elsewhere in collective contexts that aim to storm manifold Bastilles but from within. **The Novel and Revolution** Alan

Swingewood, 1975. *The Necessity of Critique* Darryl Cressman, 2022-09-27. The essays in this edited collection are inspired by Andrew Feenberg's philosophy of technology. Feenberg is the leading critical theorist of technology working today, combining the critical traditions of Karl Marx, Martin Heidegger, Georg Lukács, and Herbert Marcuse with empirical methods from science, technology studies, STS, and media studies. Divided into three parts, these contributions from philosophers, media theorists, design theorists, and STS scholars reflect the relevancy of Feenberg's philosophy for making sense of our technically mediated society. This collection appeals to students and researchers interested in the philosophy of technology, critical theory, smart cities, big data, AI, and algorithmic culture. *Fay Weldon's Fiction* Finuala Dowling, 1998. This study raises several issues of general relevance to contemporary writing and criticism: The role of the media in presenting both author and oeuvre; the position of the woman writer vis-à-vis feminism; the confrontation of feminism and postmodernism; the question of popular versus high art forms; and the emergence of the author as public oracle, are considered in relation to Weldon's considerable literary output. *Transdisciplinary Higher Education* Paul Gibbs, 2017-05-23. This book is not just about thinking or acting in transdisciplinary ways but about being transdisciplinary. To achieve this requires a deconstruction of our current way of acting within the definition of being that others impose upon us. Transdisciplinarity is a phenomenological perspective of reality and its manifestation in the world in which we exist. The volume develops a widely based transdisciplinary understanding of the issues faced by higher education institutions and those who work within and with these institutions to educate professionals. It incorporates international contributions from organisational theory, anthropologists, historians, psychologists, social sciences, philosophers, and practitioners to create a volume that makes an important and distinct contribution to the literature on higher education and professional practice. Transdisciplinarity provides one of our greatest challenges in higher education both to the way it is organized and to the nature of the curriculum. This book is an important contribution to the debate about its implications. Higher education is being challenged

by the nature of knowledge and how it is organized the world is transdisciplinary but out institutions are constrained by the disciplines This book contributes to the important debates about the challenges transdisciplinarity provides to our institutions Professor David Boud Emeritus Professor Faculty of Arts and Social Sciences University of Technology Sydney
