Nuclear Deterrence Problems And Perspectives In The 1990s

Nuclear Deterrence Serge Sur (red.), 1993 **Global Nuclear Disarmament** Nik Hynek, Michal Smetana, 2015-12-22
This book examines the issue of nuclear disarmament in different strategic political and regional contexts. This volume seeks to provide a rich theoretical and practical insight to one of the major topics in the field of international security: global abolishment of nuclear weapons. Renewed calls for a nuclear weapons free world have sparked a wide academic debate on both the attainability of such goal and the steps that should be taken. Comparably less attention however has been paid to theoretically informed considerations of the consequences of nuclear abolition. Comprising essays from leading scholars and experts within the field, this collection discusses the fundamental theoretical and conceptual foundations of nuclear disarmament and subsequently tries to assess its hypothetical impact in global and regional contexts. The varied methodological approach of the contributors aims to advance a multi theoretical and multi perspectival view of the issue. The book is organized in three main sections: Strategic Perspectives dealing with the specific constraints and facilitators for the states to achieve their core objectives; Political Perspectives with the focus on the power of norms, belief systems and ideas; and Regional Perspectives with the analyses of seven regional and or state specific nuclear contexts. As a whole, the volume provides a detailed complex overview of the risks and opportunities that are embedded in the vision of a nuclear weapon free world. This book will be of great interest to students of nuclear proliferation, arms control, war and conflict studies, international relations and security studies. *Nuclear Weapons in the Changing World* Patrick J. Garrity, Steven A. Maaranen, 1992-06-30
Lawrence Freedman: One of the major bonuses of the collapse of communism in Europe is that it may never again be necessary to enter into a sterile debate about whether it is better to be red or dead. This appeared as the ultimate question in the great nuclear debate of the early 1980s. When put so starkly, the answer appeared obvious: better to live and struggle in a totalitarian system than to destroy totalitarian and democratic systems alike. There were a number of points to be made against this. Communist regimes had demonstrated the possibility of being both red and dead, while the West had managed successfully to avoid the choice. If we allowed nuclear disarmament to become an overriding priority, this might encourage excessive respect for Soviet interests and a desire to avoid any sort of provocation to Moscow, a point not lost on those in Eastern Europe who were then struggling against repression and could not see why disarmament should be given a higher priority than freedom. Now that the old communist states have liberated themselves and the West no longer risks conspiring in their enslavement, there is a correspondingly reduced danger of mass death. As a result, and with so much else of immediate relevance, Lawrence Freedman, Department of War Studies, King's College University of London, London WC2R 2LS, England. **Nuclear Weapons in the Changing World: Perspectives from Europe, Asia and North America** **Nuclear Strategies and Nuclear Deterrence** Andrew Paul Valentine, 1986 The War That Must Never Be Fought George P. Shultz, James E. Goodby, 2015-08-01
This book discusses the nuclear dilemma from various countries' points of view from

Japan Korea the Middle East and others The final chapter proposes a new solution for the nonproliferation treaty review

Perspectives on Nuclear Deterrence in the 21st Century Beyza Unal, Yasmin Afina, Patricia Lewis, 2020 This collection of essays explores from the perspectives of eight experts four areas of deterrence theory and policymaking the underlying assumptions that shape deterrence practice the enduring value of extended deterrence the impact of emerging technologies and the blurring of the lines between conventional and nuclear weapons Ethics and Nuclear Deterrence Geoffrey Goodwin, 2020-11-19 As nuclear weapons become ever more sophisticated so the deterrence debate becomes increasingly complex The Ban the Bomb slogans of the 1950s had been replaced by cries for nuclear free zones and talk of megatonnage and fallout had given way to talk of tactical nuclear weapons and limited strike capability Originally published in 1982 this book considers the ethical issues raised by nuclear policies and by the debate between proponents of the multilateralist unilateralist approaches to disarmament and arms control at the time It is not like so many books on the subject an ideological statement there are essays by defence strategists which put the case for deterrence and essays by academics and churchmen which strenuously oppose it The book also includes an essay on attempts to mitigate the appalling brutality of the many conventional wars since 1945 At a time when the rhetoric and misinformation produced on both sides of the debate continued to obscure many vital issues this book was welcome sensible and necessary Nuclear Winter And The New Defense Systems: Problems And Perspectives, The: 4th International Sem. On Nucl War Stanislaw Stipcich, W S Newman, 1992-08-21 This series started in 1981 with the Erice Seminars when the danger of a nuclear East West confrontation was menacing the world The volumes reproduce the crucial steps from the Nuclear Winter to the Strategic Defense Initiative After the collapse of the U S S R new emergencies are now to be faced such as the danger of proliferation of Weapons for Mass Destruction WMD the North South confrontation on ecological problems and the new deal for Science and Technology to help developing countries in their struggle for a better standard of life The Erice Seminars have attracted the attention of world leaders in Science Technology and Culture **Nuclear Disarmament** P. M. Kamath, 2013-11-14 This volume presents a range of views on the current state of global nuclear disarmament from eminent scholars from India Israel and France Chapters present and analyse the relationships between India Pakistan and the USA Russia and the USA the position of the EU and of Israel **Morality, Prudence, and Nuclear Weapons** Steven P. Lee, 1996-11-13 This 1993 book is the first post Cold War assessment of nuclear deterrence providing a comprehensive normative understanding of nuclear deterrence policy *Inherent Problems with Nuclear Deterrence and the Need of Disarmament*, 2015 This paper is to discuss about the problems that nuclear deterrence has and examine the necessity of nuclear disarmament It starts from defining the meaning of nuclear deterrence and explores current situations about nuclear weapons in the world After that this paper takes a closer look at some historical cases of nuclear deterrence and finally discusses why nuclear disarmament is the most suitable way for national security The finding of this paper is that nuclear deterrence is not the most credible theory

that states should follow because there are more demerits than merits by holding the theory Nuclear abolition is the most efficient way to protect each state

The New Nuclear Disorder Challenges to Deterrence and Strategy Stephen J. Cimbala, 2015-02-01 In the twenty first century the United States confronts an international system of great complexity and shifting security challenges This book s relevance lies in its assessment of certain large looming cases including the possible acquisition and deployment of nuclear weapons by Iran and the continuing tensions created by North Korea s nuclear arsenal The Obama pivot of national security and defense emphasis to Asia reflects not only the growing economic importance of that region but also the growing number of security dilemmas in a region that is already awash in nuclear forces The management of nuclear crises and even the possible need to terminate nuclear wars before they expand beyond a single region are among the possible challenges facing future U S and allied policy makers and military leaders

Dangers of Deterrence Nigel Blake, Kay Pole, 2020-12-01 Europe has everything to lose from nuclear war and nothing to gain from it Yet it is nuclear deterrence that we are relying on to shield us from war More and more people are coming to believe that security under a nuclear shield is an illusion and that nuclear deterrence embodies a dangerous paradox It is too close to provocation it cannot prevent nuclear blackmail and its short term success can only lead to proliferation and ultimate instability In this book originally published in 1983 philosophers go behind the rhetoric of the nuclear debate and analyse the dangers of deterrence The contributors all share a concern about the radical confusions that have arisen concerning nuclear deterrence Showing how unilateral arguments can be developed from hard headed political and military considerations they stress their belief that carefully managed unilateralism is the best method for securing the political independence of Western Europe The doctrine is not founded on sheer moral idealism This book will be essential reading for anyone engaged in the public discussion of defence policy

Deep Cuts and the Future of Nuclear Deterrence Aspen Strategy Group (U.S.), 1989 This volume opens with an analysis of public opinion data which reveals that several common beliefs about public attitudes toward defense are myths The public has not repudiated nuclear deterrence public attitudes are quite stable not volatile and public opinion is not contradictory Despite the politicization of nuclear weapons policy this report explains three key elements can be combined to form a national security strategy which could be supported by a consensus of experts and publics among the Western alliance First in terms of nuclear weapons the focus of arms control negotiation should be redirected to enhancing stability at substantially lower numbers In terms of conventional weapons several initiatives should be undertaken Also civilian political leaders should begin a major NATO based study on warning and decision making Furthermore a consensus defense and arms control strategy should include restrictions on anti satellite weapons and SDI This volume is divided into five parts Introduction Stability and Change in Public Opinions about Nuclear Weapons Policy 1945 1987 Four Alternative National Security Futures Lessons Learned from Examining Radical Changes and Building Towards a Consensus Co published with the Aspen Strategy Group

Major Power Rivalry and Nuclear Risk Reduction Brad Roberts, 2020-05-20

The risks of nuclear war are widely seen as rising after a long period of hoping that nuclear weapons would recede into history along with the Cold War. Perceptions of heightened risk are driven by a nuclear arming and bellicose North Korea intensifying nuclear competition and risk taking in South Asia, heightened fears of a nuclear tipping point and potential proliferation cascade in the Middle East, and above all by an intensification of strategic competition among Russia, China, and the United States, and the re emergence of potential military flashpoints leading to armed hostilities under the nuclear shadow. Without improved cooperation among the big three major powers, these risks are likely to continue to grow. Sadly, the barriers to improved cooperation are numerous. But so are the incentives. The authors in this edited volume set out practical agendas for cooperation from their separate national perspectives, one each from Russia, China, and the United States. They argue that some new initiatives are possible within the existing political context on myriad problems, including for example, new forms of bilateral and trilateral arms control, strengthened nonproliferation discussions on strategic stability, and a renewal of the habit of ongoing discourse at both official and unofficial levels.

Nuclear Deterrence, 2015 *Nuclear Deterrence In U.S.-soviet Relations* Keith B. Payne, 2019-03-04. This book critically examines U.S. attempts to establish a nuclear deterrent against the Soviet Union and offers new approaches to dealing with the changing strategic environment. Dr. Payne maintains that the most influential theories of nuclear deterrence, Assured Vulnerability and Flexible Targeting, are unrealistic given Soviet foreign policy and attitudes toward nuclear war and no longer adequately meet the requirements of U.S. national security. Identifying an approach compatible with U.S. security commitments, he argues that future U.S. policy should focus on defeating the Soviet theory of victory on threatening Soviet military forces and domestic and external political control assets while also defending the U.S. against nuclear attack. The discussion covers recent developments among them, the new nuclear strategy of the Carter administration and President Reagan's new weapons program.

Nuclear Deterrence Theory Robert Powell, 2008-06-05. Applying recent advances in game theory to the study of nuclear deterrence, the author examines some of the most complex and problematic issues in deterrence theory. Game theoretic analysis allows the author to model the effects on deterrence strategies of first strike advantages, of limited retaliation, and of the number of nuclear superpowers involved in the international system. With the formalizations he develops, the author is able to demonstrate the fundamental similarity of the two seemingly disparate deterrence strategies that have evolved in response to the superpower arms buildup: the strategy that leaves something to chance and the strategy of limited retaliation.

Strategy and Nuclear Deterrence Steven E. Miller, 2014-07-14. This book of selections from the distinguished journal *International Security* speaks to the most important question of our age: the deterrence of nuclear war. Originally published in 1985, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy

Real-World Nuclear Deterrence David G. Coleman, Joseph M. Siracusa, 2006-06-30

The threat of nuclear weapons did not fade away with the collapse of the Soviet Union. Rather the geopolitical disorders of the post Cold War era and the rise of global terrorism have ensured that they remain conspicuously present on the world stage as a serious international concern. With the eight or nine nuclear powers maintaining about 27 000 nuclear weapons in their arsenals to this day it is clear that they are here to stay for the foreseeable future. The primary mission of these nuclear forces has been and remains deterrence. Using plain language rather than policy jargon this historically focused book shows how nuclear deterrence has worked rather than how it should. It then shows how the growing threat of nuclear proliferation threatens to create a far more complicated international situation largely because of the attendant proliferation of state nuclear deterrents. By drawing on a wide array of new sources from international archives and the latest in international scholarship Coleman and Siracusa put some of the most important and enduring problems of nuclear deterrence over the past sixty years into global context. Nuclear deterrence in the real world often operates very differently from how it should according to the prevailing theories and Coleman and Siracusa take a fresh look at how nuclear weapons policy has been made finding that it often has had surprisingly little to do with what works and what does not. By studying in depth how governments here and abroad have confronted and dealt with some of the most important issues in nuclear weapons policy for example How many nuclear weapons are enough and What is it that will deter they find that the making of nuclear weapons policy is a complex fluid bargaining process subject to the tides of politics budgets threat perception ideology technology parochial service rivalries flawed information and sometimes just plain wishful thinking.
