Control Policy in the Context of Anglo-American Relations, 1957-68 John Patrick George Freeman, 1986 *Physics and Metaphysics of Deterrence: the British Approach* Myron Greenberg, Naval War Press, 2012-08-08 The principal findings of this study are that Great Britain's search for an independent nuclear deterrent was waged with a purposeful dedication that wedded highly effective statecraft and brilliant innovative nuclear engineering to produce a strategic nuclear deterrent that remained under her sovereign control Because Britain's efforts in this area were so often achieved in the face of United States opposition Britain's subsequent utilization of her deterrent capability as an instrument to secure American support notwithstanding that opposition ought to be considered an example of successful policy management The product of this effort has been the Anglo American special relationship in nuclear weapons The demonstrable success of British policy management to nurture and secure the special relationship in nuclear weapons is confirmed by its endurance in the face of American indifference if not overt hostility to its continuation A major contention of this inquiry therefore is that the independent nature of Britain's strategic nuclear deterrent has been the primary prerequisite for the evolution of an interdependent hence special relationship with the United States This relationship will endure for it must the physics and metaphysics of strategic relationships in the thermonuclear age will secure this constancy In the meantime Britain will play a far greater role internationally than heretofore just as the special relationship binds her ever closer to the United States And this after all has always been a principal objective of British policy *The Struggle for Nuclear Partnership* Jan Melissen, 1993 *The United Kingdom and Nuclear Deterrence* Jeremy Stocker, 2013-05-13 In December 2003 the British government announced that within a few years it would need to take decisions about the future of Britain's strategic nuclear deterrent Exactly three years later its plans were revealed in a White Paper The existing Trident system is to be given a life extension which includes building new submarines to carry the missiles costing 15 20 billion Britain has a substantial nuclear legacy having owned nuclear weapons for over half a century The strategic context for the deterrent has changed completely with the end of the Cold War but nuclear weapons retain much of their salience This Adelphi Paper argues that it makes sense to remain a nuclear power in an uncertain and nuclear armed world Given that deterrence needs are now less acute but more complex than in the past the paper asserts that deterrence also needs to be aligned with non proliferation policies which seek to reduce the scale of threats that need to be deterred Somewhat overlooked in current policy are appropriate

measures of defence which can raise the nuclear threshold and if required mitigate the effects of deterrence failure It concludes that the government's decisions about the future form of the deterrent are very sensible but cautions that they still need to be integrated into a broader policy that embraces diplomacy deterrence and defence to counter the risks posed by nuclear proliferation *British Nuclear Weapons and the Test Ban 1954-1973* John R. Walker, 2016-05-23 In 1962 Dean Acheson famously described Britain as having lost an Empire but not yet found a role Perhaps nowhere is this more apparent than in the realms of nuclear weapons An increasingly marginal world power successive post war British governments felt that an independent nuclear deterrent was essential if the country was to remain at the top table of world diplomacy Focusing on a key twenty year period this study explores Britain's role in efforts to bring about a nuclear test ban treaty between 1954 and 1973 Taking a broadly chronological approach it examines the nature of defence planning the scientific goals that nuclear tests were designed to secure Anglo American relationships the efficacy of British diplomacy and its contribution to arms control and disarmament A key theme of the study is to show how the UK managed to balance the conflicting pressures created by its determination to remain a credible nuclear power whilst wanting to pursue disarmament objectives and how these pressures shifted over the period in question Based on a wealth of primary sources this book opens up the largely ignored subject of the impact of arms control on the UK nuclear weapons programme Its appraisal of the relationship between the requirements and developments of the UK nuclear weapons programme against international and domestic pressures for a test ban treaty will be of interest to anyone studying post war British defence and foreign policy history of science arms control disarmament and non proliferation and international relations It also provides important background information on current events involving nuclear proliferation and disarmament *British Nuclear Weapons and the Test Ban 1954-73* John R. Walker, 2010 Focusing on a key twenty year period this study explores Britain's role in efforts to bring about a nuclear test ban treaty between 1954 and 1973 Taking a broadly chronological approach it examines the nature of defence planning Anglo American relationships the efficacy of British diplomacy and UK contributions to arms control and disarmament The appraisal of the relationship between the requirements and developments of the UK nuclear weapons programme against the countervailing international and domestic pressures for a test ban treaty will be of interest to anyone studying post war British defence and foreign policy history of science arms control disarmament and non proliferation and international relations or who is looking for background information on current events involving nuclear proliferation and disarmament *Physics and Metaphysics of Deterrence* Myron A. Greenberg, 1994 **Dependence and Deterrence** George Michael Dillon, 1983 **The Official History of the UK Strategic Nuclear Deterrent: From the V-bomber era to the arrival of Polaris, 1945-1964** Matthew Jones, 2017 Volume I From the V bomber era to the arrival of Polaris 1945 1964 volume II The Labour government and the Polaris programme 1964 1970 **The Politics of the Anglo-American Nuclear Relationship, 1957-1962** Una O'Sullivan, 1993 **Skybolt and the Anglo-American Nuclear**
