## **Nuclear Heartland A Guide To The 1000 Missile Silos Of The United States:**

**Nuclear Heartland** Samuel H. Day,1988 American Anti-Nuclear Activism, 1975-1990 K. Harvey,2014-10-28 Looking at national peace organizations alongside lesser known protest collectives this book argues that anti nuclear activists encountered familiar challenges common to other social movements of the late twentieth century **The Missile Next**

**Door** Gretchen Heefner,2012-09-10 In the 1960s the Air Force buried 1 000 ICBMs in pastures across the Great Plains to keep U S nuclear strategy out of view As rural civilians of all political stripes found themselves living in the Soviet crosshairs a proud Plains individualism gave way to an economic dependence on the military industrial complex that still persists today

**Nuclear Country** Catherine McNicol Stock,2020-09-18 Militarization and nuclearization were the historical developments most essential to the creation of the rural New Right Both North Dakota and South Dakota have long been among the most reliably Republican states in the nation in the past century voters have only chosen two Democrats Franklin Roosevelt and Lyndon B Johnson and in 2016 both states preferred Donald Trump by over thirty points Yet in the decades before World War II the people of the Northern Plains were not universally politically conservative Instead many Dakotans including Republicans supported experiments in agrarian democracy that incorporated ideas from populism and progressivism to socialism and communism and fought against bigness in all its forms including bonanza farms out of state railroads corporations banks corrupt political parties and distant federal bureaucracies but also surprisingly the culture of militarism and the expansion of American military power abroad In Nuclear Country Catherine McNicol Stock explores the question of why between 1968 and 1992 most voters in the Dakotas abandoned their distinctive ideological heritage and came to embrace the conservatism of the New Right Stock focuses on how this transformation coincided with the coming of the military and national security states to the countryside via the placement of military bases and nuclear missile silos on the Northern Plains This militarization influenced regional political culture by reinforcing or re contextualizing long standing local ideas and practices particularly when the people of the plains found that they shared culturally conservative values with the military After adopting the first two planks of the New Right national defense and conservative social ideas Dakotans endorsed the third plank of New Right ideology fiscal conservatism Ultimately Stock contends that militarization and nuclearization were the historical developments most essential to the creation of the rural New Right throughout the United States and that their impact can best be seen in this often overlooked region s history **Bulletin of the Atomic**

**Scientists** ,1988-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **The Archaeology of the Cold War** Todd A. Hanson,2019-10-14 Although the

United States and the Soviet Union never met in combat the Cold War and its looming threat of a nuclear apocalypse left a profound and permanent mark on North America s built environment Hanson uses cases studies from Bikini Atoll the Nevada

Test Site and the NIKE Hercules Missile Battery Site in Alaska among others to synthesize the major methodological theoretical and substantive contributions to the field of Cold War archaeology and to consider the numerous economic political and cultural issues related to the preservation of Cold War heritage sites Provided by publisher **Underground Structures of the Cold War** Paul Ozorak, 2012-04-30 A vivid reminder of the ever present threat of a global apocalypse that formed the backdrop to the Cold War This is an excellent book History of War Medieval castles the defensive systems of the seventeenth eighteenth and nineteenth centuries the trenches and bunkers of the First World War the great citadels of the Second World War all these have been described in depth But the fortifications of the Cold War the hidden forts of the nuclear age have not been catalogued and studied in the same way Paul Ozorak's *Underground Structures of the Cold War: The World Below* fills the gap After the devastation caused by the atom bombs dropped on Hiroshima and Nagasaki and the outbreak of the Cold War all over the world shelters were constructed deep underground for civilians government leaders and the military Wartime structures were taken over and adapted and thousands of men went to work drilling new tunnels and constructing bunkers of every possible size At the height of the Cold War in some countries an industry of bunker makers profited from the public's fear of annihilation Paul Ozorak describes when and where these bunkers were built and records what has become of them He explains how they would have been used if a nuclear war had broken out and in the case of weapons bases he shows how these weapons would have been deployed His account covers every sort of facility public shelters missile sites command and communication centers storage depots hospitals A surprising amount of information has appeared in the media about these places since the end of the Cold War and Paul Ozorak's book takes full advantage of it

**Democracy's Think Tank** Brian S. Mueller, 2021-07-02 In *Democracy's Think Tank* Brian S. Mueller places the Institute for Policy Studies (IPS) at the center of a network of activists involved in making the world safe for diversity Unlike defense intellectuals at the RAND Corporation and other think tanks responsible for formulating military strategy the peace intellectuals at IPS developed blueprints for an alternative to the U.S. led world order As the Iron Curtain fell across Eastern Europe a triumphalist Cold War narrative emerged proclaiming victory for freedom democracy and free enterprise over totalitarianism Yet for the peace intellectuals at IPS the occasion did not merit celebration Since its doors opened in 1963 IPS refused to embrace American exceptionalism and waged a battle against the Cold War and its liberal anti-communist supporters As IPS founders Marcus Raskin and Richard Barnett saw it in the process of fighting communism and preserving the liberal capitalist order Cold War liberals had forsaken democracy *Democracy's Think Tank* tells the story of IPS's crusade to resurrect democracy at home and abroad Borrowing from populist progressive and New Left traditions IPS challenged elite expertise and sought to restore power to the people To this end IPS in the words of journalist I.F. Stone served as the institute for the rest of us Mueller tells the story of IPS's involvement in a broad range of grassroots campaigns aimed at ending the Cold War and increasing participatory democracy in the United States and across the globe Contemporary

observers seeking an alternative to American empire in the twenty first century will find Democracy s Think Tank offers several possible paths toward a more democratic order      **Cold War in a Cold Land** David W. Mills,2015-03-11 David W Mills offers an enlightening look at what most of the heartland was up to while America was united in its war on Reds Cold War in a Cold Land adopts a regional perspective to develop a new understanding of a critical chapter in the nation s history

*The Nevada Test Site* Emmet Gowin,2019-10-08 Emmet Gowin likes to ask a provocative question Which country on earth has had the largest number of nuclear bombs detonated within its borders The answer is the United States Covering approximately 680 square miles the Nevada National Security Site formerly known as the Nevada Test Site was the primary testing location of American nuclear devices from 1951 to 1992 1 021 announced nuclear tests occurred there 921 of which were underground The site which is closed to the public including its airspace contains 28 areas 1 100 buildings 400 miles of paved roads 300 miles of unpaved roads 10 heliports and two airstrips Its surface is covered with subsidence craters from testing and in places looks like the moon In 1996 Gowin received permission to document the landscape by air after over a decade of working to secure access These aerial views of environmental devastation made quietly majestic but no less potent in the hands of a master photographer unveil environmental travesties on a grand scale While groups of images from the Nevada Test Site series have been published previously this book will produce the largest number yet and three quarters of the pictures will not have been published at all Gowin is the only photographer to have been granted access to this site which is now permanently closed post 9 11 Other than images made by the government for geographic purposes no other images of this landscape exist The book will feature a preface by photographer Robert Adams America b 1937 whose photographic and written work is concerned with landscape urbanization and activism It will also feature an afterword by Gowin on how he made the images and their significance to him today Provided by publisher      **Peace Movement Organizations and Activists in the U.S.** John Lofland,Victoria Lee Johnson,Pamela Kato,1991 Here is the most comprehensive compilation and analytic classification of book length publications on the immense upwelling of peace activism that occurred in the United States during the 1980 s It is an indispensable reference addition to the bookshelf of all researchers of peace movements in the United States Focusing on the post World War II years with particular attention to the 1980 s this volume is an extensive bibliography of books categorized into six categories by theory transcenders educators intellectuals politicians protestors and prophets Peace Movement Organizations and Activists in the United States An Analytic Bibliography is an indispensable tool for researchers and students of peace movements from several disciplines including history political science security studies sociology and international relations      Bulletin of the Atomic Scientists ,1988-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world      **Miles from Nowhere** Dayton Duncan,2000-09-01 In this splendid book a gifted observer and a terrific idea have come together in a real love match

In 1990 a century after the census bureau's famous observation of the frontier's imminent end Dayton Duncan set out in an aging GMC Suburban to visit a large sampling of counties outside Alaska that have fewer than two persons per square mile the bureau's old standard for places still in a frontier condition There are 132 such counties All are in the West The result of his tour is an insightful and entertaining book troubling and funny and consistently illuminating Much of the book's charm comes from Duncan's sketches of people who choose to live miles from nowhere ranchers in the Nebraska sandhills a New Mexican bar owner a priest and United Parcel Service driver along the Texas Mexico border and the descendant of a Seminole Negro army scout in west Texas In them he finds characteristics associated with the mythic frontier Great fun to read Montana Born and raised in a small town in Iowa Dayton Duncan has been a reporter humor columnist editorial writer chief of staff to a governor and deputy press secretary for presidential campaigns He lives in Walpole New Hampshire His books include *Out West An American Journey* also available in a Bison Books edition **The Tainted Desert** Valerie L. Kuletz, 2016-04-29 For decades nuclear testing in America's southwest was shrouded in secrecy with images gradually made public of mushroom clouds blooming over the desert Now another nuclear crisis looms over this region the storage of tens of thousands of tons of nuclear waste *Tainted Desert* maps the nuclear landscapes of the US inter desert southwest a land sacrificed to the Cold War arms race and nuclear energy policy *North Country Anvil*, 1987 *The Witness*, 1988 [The Nuclear Present](#) Grant Burns, 1992 thorough and complete well written annotations recommended to libraries at all levels CHOICE An exceptionally thorough guide JOURNAL OF AMERICAN HISTORY **The Atomic Bomb** Hans G. Graetzer, Larry M. Browning, 1992 Annoteret bibliografi om atombomben atomvåben og atomteknik **Bulletin of the Atomic Scientists**, 1946 **Local Consequences of the Global Cold War** Jeffrey A. Engel, 2007 Up to now the study of cold war history has been fully engaged in stressing the international character and broad themes of the story This volume turns such diplomatic history upside down by studying how actions of international relations affected local popular life Each chapter has its origins in a major international issue and then unfolds the consequences of that issue for some region or city Thus the starting points for the various contributions are great unifying questions regarding postwar occupation militarization industrialization and decolonization But the ending points are small and dispersed such as movies in Japan race relations in the American South forests in East Germany and industry in Novosibirsk Collectively these stories show how the cold war affected every facet of life East and West urban and rural in developed and developing nations in the superpowers and on the periphery of the international system
