Nuclear Power and the Energy Crisis D. Burn, 1978-06-17      **Nuclear Power and the Energy Crisis** Duncan Burn, 1978

*Politics and Nuclear Power* Michael T. Hatch, 2021-12-15 With the dramatic changes OPEC precipitated in the structure of world energy markets during the 1970s energy became a central concern to policymakers throughout the industrialized West This book examines the responses of public officials in three leading European nations the Federal Republic of Germany France and the Netherlands to the energy crisis As the study shows the proposed energy programs in the three countries shared remarkable similarities yet the policy outcomes were very different To explain why Michael T Hatch goes beyond the specific content of government energy policy to include an analysis of the policymaking process itself At the heart of the study is an exploration of the various dimensions of nuclear policy in West Germany The political consensus on nuclear power that prevailed in the initial years following the energy crisis disintegrated as antinuclear citizens initiatives the courts and trade unions as well as the traditional political parties entered the policymaking process Subsequent government efforts to resolve the political stalemate over nuclear power foundered in a morass of domestic electoral politics and an international debate over nuclear proliferation Extending the analysis to comparisons with French and Dutch nuclear strategies Hatch argues that the critical factor in determining nuclear policy was the manner in which the political system structured the nuclear debate In contrast to West Germany where the electoral and parliamentary systems enhanced the influence of the antinuclear Greens the electoral system and constellation of political parties in France served to dissipate the influence of the antinuclear forces Thus in France the nuclear program encountered few impediments In the Netherlands as in West Germany government policy was paralyzed in the face of antinuclear sentiment across a broad spectrum of Dutch society Hatch has provided here not only a useful examination of the development of energy policy in western Europe but also a case study of the close interplay between policy and politics      The Economic History of Nuclear Energy in Spain M.d.Mar Rubio-Varas, Joseba De la Torre, 2017-11-10 This book analyses the economic history of the nuclear program in Spain from its inception in the 1950s to the nuclear moratorium in the early 1980s and investigates the economic financial and business origins of atomic energy in Spain The actual dimension of the Spanish nuclear sector which exceeded the relative economic and political clout of the country at the time reflects the combination of domestic and foreign interests Each contribution inserts the Spanish case within the international development of nuclear energy but also shows how the Spanish nuclear program came about how it was financed and who the main architects and beneficiaries at the industrial financial commercial and banking levels were all without losing sight of the energy policy aspects such as energy mix and energy security The volume provides useful analysis and sources for a variety of core fields across the social sciences including economic history of post war Europe industrial and energy policy international relations and history of technology

**Nuclear Power Policies in Britain** Lucie de Carvalho, 2022-10-11 Nuclear power is a most fascinating research object

technological by nature it involves a socio cultural imagery embedded in the broader framework of a country's societal and political traditions and practices The aims of Nuclear Power Policies in Britain are twofold being both empirical and theoretical on the one hand it tackles the debates factors or issues bewildering nuclear decisions in the UK and on the other it addresses the broader question of government leverage and governance in today's neoliberal context Analysing the current British nuclear policy ignites a broader discussion about the abilities and leverage of the state to spur innovation and influence techno political decisions in a neoliberal context Neoliberalism is thus used as both a theoretical framework and a normative political doctrine This book delves into a much topical and critical facet of today's British politics opening up inroads into a wide range of fundamental questions regarding public policy dynamics the critical function of energy choices the roles of the public in national industrial projects and the impact of international regulation on national constraints

*Nuclear Power in Crisis* Andrew Blowers, David Pepper, 2019-04-01 Originally published in 1987 The Chernobyl disaster intensified the whole debate on the nuclear power industry There was great public concern about the industry regulation about the siting of nuclear facilities including the dumping of nuclear waste and about the alleged secretiveness of the industry This book examines these and many other important aspects of the industry worldwide and provides much important original research It focuses in particular on the political processes which control the industry on waste disposal and on the social impact

*Governance of the American Economy* John L. Campbell, J. Rogers Hollingsworth, Leon N. Lindberg, 1991-05-31 In this book nine scholars representing various perspectives examine institutions that govern economic activity in the United States and the dramatic changes they have undergone since the late nineteenth century They investigate how and why these changes occurred and continue to occur as markets become more volatile technology changes and international competition becomes more intense They also address general questions about the governance of capitalist economies by considering several governance mechanisms such as markets bureaucratic hierarchies associations and informal networks and by exploring how such mechanisms emerge to coordinate economic activity and affect economic performance The first part of the book describes the important characteristics of these organisational forms and provides an overview of institutional development in the US economy The second part includes case studies of the institutional development of eight economic sectors Finally based on data from these case studies the third part of the book tests competing theories of institutional change in capitalism develops a new evolutionary model of the change process and offers an original analysis of how the state influences this process

**Collapse of an Industry** John L. Campbell, 2019-01-24 The commercial nuclear power industry was flourishing in the United States in the early 1970s fifteen years later the enterprise had collapsed John L. Campbell examines the history of this debacle in order to explore how state and market shape each other under modern capitalism In *Collapse of an Industry* Campbell confronts controversial issues whose implications range far beyond the specifics of the nuclear power industry the relative merits of free and controlled markets the reliability of

industrial planning and the appropriate role of the state in managing economic activity Ultimately Campbell sheds light on the central question of whether modern democracy and capitalism may be essentially incompatible A complex expensive and potentially very dangerous technology nuclear energy requires careful long range planning to sustain commercial success Campbell s narrative account shows how political and economic institutions unique to the United States made the nuclear energy industry particularly vulnerable to a series of policy failures that undermined that planning Drawing on industry histories and trade publications government documents and personal interviews he considers four key areas central to the collapse of the sector competition and the failure to standardize equipment growing public concern over reactor safety and the disposal of radioactive waste the industry s financial crisis and the complex politics of regulation Campbell argues that the democratic institutions of the contemporary United States will not support the predictable conditions needed for accumulation in so capital intensive and potentially hazardous a sector as commercial nuclear power He emphasizes the importance of institutional forms to the making of public policy by contrasting the industry s demise in the United States with its modest successes in Western Europe demonstrating how variations in important governmental and private institutions affected the general health of the industry in France Sweden and West Germany A theoretically informed analysis free of the usual polemics about nuclear power Collapse of an Industry merits the close attention of anyone concerned with the future of the commercial nuclear power industry

*Nuclear Energy as a Political and Social Issue* Sandra C. Danforth,1982

*The NUM and British Politics: 1944-1968* Andrew Taylor,2003 The NUM and British Politics makes use of union material party and government archives as well as oral testimony much of it highly confidential to present the first overall account of the evolving nature of the tripartite relationship between the mine

**Science, Technology and the British Industrial 'Decline', 1870-1970** David Edgerton,1996-06-28 The place of science and technology in the British economy and society is widely seen as critical to our understanding of the British decline There is a long tradition of characterising post 1870 Britain by its lack of enthusiasm for science and by the low social status of the practitioners of technology David Edgerton examines these assumptions analysing the arguments for them and pointing out the different intellectual traditions from which they arise Drawing on a wealth of statistical data he argues that British innovation and technical training were much stronger than is generally believed and that from 1870 to 1970 Britain s innovative record was comparable to that of Germany This book is a comprehensive study of the history of British science and technology in relation to economic performance It will be of interest to scientists and engineers as well as economic historians and will be invaluable to students approaching the subject for the first time

**Public Enterprise Revisited** Chrisafis H. Iordanoglou,2001-01-01 The book compares the 1954 79 labour productivity record of five expanding public sector industries to that of 24 expanding capital intensive mass production industries in the British private sector The author shows that the public sector industries labour productivity growth was significantly faster than that of the private sector industries Strikingly he also finds that the state owned

industries were narrowing their productivity gap with their US counterparts at a significantly faster rate than the private sector industries Dr Iordanoglou concludes that it is possible that public ownership had in the historical period investigated a long term positive effect on these industries

BOOK JACKET      *International Bibliography of Business History* Francis Goodall,Terry Gourvish,Steven Tolliday,2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians      Energy Research Abstracts ,1977 Semiannual with semiannual and annual indexes References to all scientific and technical literature coming from DOE its laboratories energy centers and contractors Includes all works deriving from DOE other related government sponsored information and foreign nonnuclear information Arranged under 39 categories e g Biomedical sciences basic studies Biomedical sciences applied studies Health and safety and Fusion energy Entry gives bibliographical information and abstract Corporate author subject report number indexes      UK Energy Richard Bending,Richard Eden,1984 This book provides a detailed assessment of the current UK energy situation future needs and energy policies Past policies have often taken too little account of uncertainty and have therefore quickly become outdated The book concludes that the need for a positive energy policy is increasingly urgent The book is in three parts The first part sets the UK in the world energy context reviews the history of UK energy policy and institutions and describes the current pattern of fuel use The second part contains detailed analysis and discussion of UK energy demand and supply The third part of the book reviews policies for energy conservation and discusses the overall energy prospects for the UK The concluding chapter examines energy policy objectives relating them to the problems and issues identified in the book The authors are amongst the leading authorities on UK energy and are co authors of *Energy Economics* also published by Cambridge University Press      *Shoreham and the Rise and Fall of the Nuclear Power Industry* Kenneth McCallion,1995-12-11 This book traces the history of the nuclear power industry in the United States from the 1950s when electricity from nuclear power was expected to be too cheap to meter to the 1990s when the nuclear power industry lies in shambles and the landscape is dotted with the billion dollar carcasses of unfinished or inoperable nuclear power plants Using the Shoreham Nuclear Power Plant on Long Island as a case study and reviewing the civil racketeering trial relating to that plant McCallion details how a fatal combination of fraud incompetence and naivete has driven utility companies to the brink and in some cases beyond the brink of bankruptcy in the vain quest for

the nuclear power fix      Nuclear Politics in America Robert J. Duffy, 1997 Duffy's work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years. He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support. The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal, new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities.
