Nuclear Power In Crisis Politics And Planning For The Nuclear State:

Nuclear Power in Crisis Andrew Blowers, David Pepper, 2019-04-01 Originally published in 1987 The Chernobyl disaster intensified the whole debate on the nuclear power industry There was great public concern about the industry regulation about the siting of nuclear facilities including the dumping of nuclear waste and about the alleged secretiveness of the industry This book examines these and many other important aspects of the industry worldwide and provides much important original research It focuses in particular on the political processes which control the industry on waste disposal and on the social impact Nuclear Power in Crisis Andrew Blowers, David Pepper, 1987 **The National Politics of Nuclear Power** Benjamin K. Sovacool, Scott V. Valentine, 2012 This book offers a comprehensive assessment of the dynamics driving and constraining nuclear power development in Asia Europe and North America providing detailed comparative analysis The book formulates a theory of nuclear socio political economy which highlights six factors necessary for embarking on nuclear power programs 1 national security and secrecy 2 technocratic ideology 3 economic interventionism 4 a centrally coordinated energy stakeholder network 5 subordination of opposition to political authority and 6 social peripheralization The book validates this theory by confirming the presence of these six drivers during the initial nuclear power developmental periods in eight countries the United States France Japan Russia the former Soviet Union South Korea Canada China and India The authors then apply this framework as a predictive tool to evaluate contemporary nuclear power trends They discuss what this theory means for developed and developing countries which exhibit the potential for nuclear development on a major scale and examine how the new renaissance of nuclear power may affect the promotion of renewable energy global energy security and development policy as a whole The volume also assesses the influence of climate change and the recent nuclear accident in Fukushima Japan on the nuclear power industry s trajectory This book will be of interest to students of energy policy and security nuclear proliferation international security global governance and IR in general *An Industrial Geography of the Netherlands* M. de Smidt, E. Wever, 1990 **Energy Abstracts for Policy Analysis**, 1988 Routledge Library Editions: Energy Resources Various, 2021-06-23 Reissuing works originally published between 1961 and 1990 this set of 12 books offers a selection of scholarship on the history of natural resources Many of the titles discuss the nuclear power debate from various angles while others look at coal or resources and energy in the third world **Radioactive Waste Management**, 1981 *Low Carbon Energy in the Middle East and North Africa* Robin Mills, Li-Chen Sim, 2021-02-01 This book explores the evolving roles of energy stakeholders and geopolitical considerations leveraging on the dizzying array of planned and actual projects for solar wind hydropower waste to energy and nuclear power in the region Over the next few decades favorable economics for low carbon energy sources combined with stagnant oil demand growth will facilitate a shift away from today s fossil fuel based energy system Will the countries of the Middle East and North Africa be losers or leaders in this energy transition Will state society relations undergo a change as a result It suggests that ultimately politics more so

than economics or environmental pressure will determine the speed scope and effects of low carbon energy uptake in the region This book is of interest to academics working in the fields of International Relations International Political Economy Comparative Political Economy Energy Economics and International Business Consultants practitioners policy makers and risk analysts will also find the insights helpful Stakeholders and Scientists Joanna Burger, 2011-08-23 Nation and the World must move forward with development of a range of energy sources and savings all with attendant environmental problems Solving these problems and those remaining from past energy related activities will require iteration inclusion and collaboration with a wide range of stakeholders including U S State and local governmental agencies Tribal Nations scientists environmentalists public policy makers and the general public *Energy, Land and Public Policy* J. We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead, we have increased the lethality of our combat through revolutions in weapons technology and military training. The Encyclopedia of Violence, Peace and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena. Ten years on, the need for an authoritative and cross-disciplinary approach to the great issues of violence and peace seems greater than ever. More than 200 authoritative multidisciplinary articles in a 3-volume set. Many brand new articles alongside revised and updated content from the First Edition. Article outline and glossary of key terms at the beginning of each article. Entries arranged alphabetically for easy access. Articles written by more than 200 eminent contributors from around the world.

Society, Resistance and Civil Nuclear Policy in India Varigonda Kesava Chandra, 2020-11-29. This book explores how anti-nuclear social movements impact the state's civil nuclear policy and its implementation by presenting a historical comparative case study of anti-nuclear movements in India. Drawing on social movement theory and empirical methods, the book demonstrates that the ability for anti-nuclear movements to impede the inception of nuclear plants is a key element of India's civil nuclear policy. It is determined by the movement's collective action repertoires, the politicisation of nuclear power, and the state's larger developmental paradigm and the openness of state input structures. The case studies of anti-nuclear movements in Haripur, Kudankulam, and Kovvada demonstrate how the implementation of civil nuclear policy is also determined by the state's technical and financial capacity and effective international collaboration. With a focus on the theorisation of social movements and their impact, combined with empirical studies of anti-nuclear movements as well as the historical trajectory of civil nuclear development, the book adds a new prism to the study of India's civil nuclear policy and anti-nuclear opposition. It will be of interest to researchers working on social movements, state-society relations, energy studies, and civil nuclear energy in the context of South Asia and the Global South.
