Kissinger, Sam Nunn, 2014-09-01 Concern about the threat posed by nuclear weapons has preoccupied the United States and presidents of the United States since the beginning of the nuclear era Nuclear Security draws from papers presented at the 2013 meeting of the American Nuclear Society examining worldwide efforts to control nuclear weapons and ensure the safety of the nuclear enterprise of weapons and reactors against catastrophic accidents The distinguished contributors all known for their long standing interest in getting better control of the threats posed by nuclear weapons and reactors discuss what we can learn from past successes and failures and attempt to identify the key ingredients for a road ahead that can lead us toward a world free of nuclear weapons The authors review historical efforts to deal with the challenge of nuclear weapons with a focus on the momentous arms control negotiations between U S president Ronald Reagan and Mikhail Gorbachev They offer specific recommendations for reducing risks that should be adopted by the nuclear enterprise both military and civilian in the United States and abroad Since the risks posed by the nuclear enterprise are so high they conclude no reasonable effort should be spared to ensure safety and security      **Nuclear Safeguards, Security, and Nonproliferation** James Doyle, 2019-02-15 Nuclear Safeguards Security and Nonproliferation Achieving Security with Technology and Policy Second Edition is a comprehensive reference covering the cutting edge technologies used to trace track and safeguard nuclear material Sections cover security the illicit trafficking of nuclear materials improvised nuclear devices and how to prevent nuclear terrorism International case studies of security at nuclear facilities and illegal nuclear trade activities provide specific examples of the complex issues surrounding the technology and policy for nuclear material protection control and accountability New case studies include analyses of nuclear programs of important countries such as North Korea Iran and Kazakhstan among others This is a thoroughly updated must have volume for private and public organizations involved in driving national security domestic and international policy issues relating to nuclear material security non proliferation and nuclear transparency Covers the continuing efforts to reduce the size of nuclear arsenals Highlights the challenges of verifying nuclear weapons reduction Summarizes issues from the 2015 Nonproliferation Treaty Review Conference Illuminates the evolving status of nonproliferation and safeguards in Iran and DPRK      Nuclear Security Culture Igor Khripunov, Nikolay Ischenko, James P. unforeseen circumstances arise A workforce made up of individuals who are vigilant who question irregularities execute their work diligently and exhibit high standards of personal and collective behaviour is able to achieve effective nuclear security Building upon this understanding of the importance of a strong nuclear security culture this publication provides practical guidance on how to implement a systematic nuclear security culture enhancement programme

**South Asia's Nuclear Security** Bhumitra Chakma, 2014-12-17 South Asia is often viewed as a potential nuclear flashpoint and a probable source of nuclear terrorism But how valid are such perceptions This book seeks to address this question and assesses the region's nuclear security from two principal standpoints First it evaluates the robustness of the Indo Pakistani mutual deterrence by analysing the strength and weaknesses of the competing arguments regarding the issue It also analyses the causes and consequences of nuclear arms race between India and Pakistan the nature of deterrence structure in the region and the challenges of confidence building and arms control between the two countries in order to assess the robustness of South Asia's nuclear deterrence Second it assesses the safety and security of the nuclear assets and nuclear infrastructure of India and Pakistan The author holds that the debate on South Asia's nuclear security is largely misplaced because the optimists tend to overemphasise the stabilising effects of nuclear weapons and the pessimists are too alarmists It is argued that while the risks of nuclear weapons are significant it is unlikely that India and Pakistan will give up their nuclear arsenals in the foreseeable future Therefore what needs to happen is that while nuclear elimination should be the long term goal in the interim years the two countries need to pursue minimum deterrence policies to reduce the likelihood of deterrence failure and the possibility of obtaining fissile materials by non state actors

Controlling Threats to Nuclear Security James L. Ford, 1997 The collapse of the Soviet Union although providing a host of welcome opportunities for people of that nation also exacerbated a number of transnational concerns just as serious as those that emanated from the bipolar hostility of the previous 50 years Among these challenges is the marked increase in the theft of and illegal trafficking in nuclear materials often referred to as nuclear smuggling Prior to the early 1990s nuclear smuggling generally involved small quantities of bogus materials or at most nuclear associated materials that posed no serious danger to security Recently however several disturbing incidents involving kilogram quantities of sensitive nuclear materials suitable for constructing bombs have occurred No one doubts that hostile groups could conceivably bring weapons usable nuclear material into the United States Moreover nuclear smuggling represents a possible shortcut for states such as Iran seeking plutonium or highly enriched uranium for their weapons program The consequences of such states succeeding would be profound

Nuclear Weapons Complex,2011-04-07 A nuclear weapon or a significant quantity of special nuclear material SNM would be of great value to a terrorist or other adversary It might have particular value if acquired from a U S facility in addition to acquiring a highly destructive tool the adversary would demonstrate an inability of the United States to protect its nuclear assets The United States expends considerable resources toward maintaining effective security at facilities that house its nuclear assets However particularly in a budget constrained environment it is essential that these assets are also secured efficiently meaning at reasonable cost and imposing minimal burdens on the primary missions of the organizations that operate U S nuclear facilities It is in this context that the U S Congress directed the National Nuclear Security Administration NNSA a semi autonomous agency in the U S Department of Energy DOE responsible for securing nuclear weapons and significant quantities of SNM asked the National Academies for advice on augmenting its security approach particularly on the applicability of quantitative and other risk based approaches for securing its facilities In carrying out its charge the committee has focused on what actions NNSA could take to make its security approach more effective and efficient The committee concluded that the solution to balancing cost security and operations at facilities in the nuclear weapons complex is not to assess security risks more quantitatively or more precisely This is primarily because there is no comprehensive analytical basis for defining the attack strategies that a malicious creative and deliberate adversary might employ or the probabilities associated with them However using structured thinking processes and techniques to characterize security risk could improve NNSA s understanding of security vulnerabilities and guide more effective resource allocation

will enable countries to fulfill their international obligations and implement United Nations Security Council Resolution 1540. The book reflects the presentations and deliberations of workshop participants and will be of interest to governments, international organizations, researchers, and practitioners whose work involves the human dimension of the security of CBRN materials.

**Legal Framework for Strengthening Nuclear Security and Combating Nuclear Terrorism** Igor Khripunov, Dmitriy Nikonov, 2012. New international approaches to strengthening nuclear security and combating the threat of nuclear terrorism have been introduced throughout the first decade of the 21st century. The adoption of new and revised mandatory international legal instruments as well as other non-binding initiatives and voluntary mechanisms have led to improved security measures in this critical area, but there is still a need for substantive and procedural arrangements to be significantly strengthened. This book is a collection of the presentations and deliberations of participants at the NATO Advanced Research Workshop held in Vienna, Austria, in January 2010. The workshop was attended by over 100 international experts from more than 20 countries, and the papers presented here summarize current understanding of and approaches to the legal framework for nuclear security and counterterrorism. The book will be of interest to all governments, international organizations, researchers, and practitioners worldwide who are involved in securing nuclear materials and preventing nuclear terrorism.
