Nuclear Turning Point:

The Nuclear Turning Point Harold A. Feiveson, 2010-12-01 Despite the ongoing drawdown of strategic forces under the terms of START both the United States and Russia maintain large arsenals of nuclear weapons poised for immediate launch Under the most optimistic current scenarios these arsenals will remain very large and launch ready for more than a decade This book by a distinguished group of coauthors critically evaluates the current policy of retaining and operating large nuclear arsenals It reviews U S nuclear doctrine and strategy and the role of nuclear weapons in deterring aggression by former Cold War adversaries and other countries with weapons of mass destruction The risks of inadvertent as well as deliberate nuclear attack are assessed The authors argue that small arsenals low hundreds on low alert satisfy all justifiable requirements for nuclear weapons They present a blueprint for making deep cuts in U S and Russian deployments and for lowering their alert level They explain the implications of shifting to small arsenals for further constraining anti ballistic missile defenses strengthening verification and capping or reducing the nuclear arsenals of China France and Britain as well as the threshold nuclear states The political challenges and opportunities both domestic and international for achieving deep reductions in the size and readiness of nuclear forces are analyzed by the authors and by distinguished experts from other countries The coauthors are Bruce Blair Jonathan Dean James Goodby Steve Fetter Hal Feiveson George Lewis Janne Nolan Theodore Postol and Frank von Hippel An appendix with international perspectives by Li Bin China Alexei Arbatov Russia Therese Delpech France Pervez Hoodbhoy Pakistan Shai Feldman Israel Harald Mueller Germany and Zia Mian and M V Ramana South Asia *The Nuclear Turning Point* Harold A. Feiveson, Bruce G. Blair, 1999-01 The authors argue that small U S and Russian arsenals on low alert satisfy all reasonable requirements of deterrence while greatly alleviating the more urgent problem of operational safety They present a blueprint for making deep cuts in these arsenals and for taking them off hair trigger alert BOOK JACKET **Megawatts and Megatons** Georges Charpak, Richard L. McAdams, 1988-01-01 Who am I And how do I fit into the world These are the questions individuals ask themselves to make sense of their lives Power Intimacy and the Life Story addresses the human quest for identity The author reinterprets some of the classic writings in psychology as he shows how each of us constructs a life story in order to meet the identity challenge and create a sense of unity and purpose in our lives Written for the social scientist practicing clinician educated layperson and student this compelling study describes how we construct stories that are organized by the two general life themes of power and intimacy Using the results of questionnaires and interviews with both college students and older adults the author illustrates an innovative way of understanding human lives in literary terms *Nuclear Weapons* Stuart Casey-Maslen, 2021-11-04 A new nuclear arms race is underway between Russia and the United States one that focuses on the technology of delivery of nuclear warheads This

Designing Denuclearization Bruce Larkin, 2018-02-06 This work canvasses nuclear weapon abolition proposals placed on the table since 1945 and the obstacles and issues which a realistic program for abolition confronts today It has an ambitious purpose to show that nuclear abolition can and should be placed on the public agenda a The author terms it interpretive in that it incorporates his commentaries never hiding his reasons and judgments It is neither just the facts nor all the facts It is an encyclopedia in the original meaning of a general course of instruction He identifies himself with all who pursue the problem posed by nuclear weapons systematically and with seriousness of purpose committed to self instruction In another sense he writes this work is a conversation with the Reader What is needed to abolish nuclear weapons His starting point is this As long as nuclear weapons are stockpiled and deployed there is risk of their use which would be catastrophic Abolition however is inconceivable in the absence of a developed and articulated alternative to the nuclear status quo Even with that the politics of abolition bringing the governments of the nuclear weapon states to believe that abolition is in their interest is the sine qua non of achieving a world free of nuclear weapons Larkin s text is written for those whether practitioners or citizens interested in designing and bringing about denuclearization Abolition cannot be achieved by political elites in the absence of broad concurrent public support Governments career policy officials and legislators have chosen to assume responsibility for the public agenda They may be asked must be asked what they will do to bring about denuclearization

Networked Nonproliferation Michal Onderco, 2021-10-05 The Treaty on Non Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons But against all predictions the treaty was extended indefinitely and without a vote Networked Nonproliferation offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With Networked Nonproliferation Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power

Technological Change and the Future of Warfare Michael E. O'Hanlon, 2011-04-01 In light of the spectacular performance of American high technology weapons in the 1991 Persian Gulf War as well as the phenomenal pace of innovation in the modern computer industry many defense analysts have posited that we are on the threshold of a revolution in military affairs RMA The issue has more than semantic importance Many RMA proponents have begun to argue for major changes in Pentagon budgetary priorities and even in American foreign policy more generally to free up resources to pursue a transformed U S military and to make sure that other countries do not take advantage of the purported RMA before we do This book takes a more measured perspective Beginning with a survey of various types of defense technologies it argues that while important developments are indeed under way most impressively in electronics and computer systems the overall thrust of contemporary military innovation is probably not of a revolutionary magnitude Some reorientation of U S defense dollars is appropriate largely to improve homeland defense and to take advantage of the promise of modern electronics systems and precision guided munitions But radical shifts in U S security policy and Pentagon budget priorities appear unwarranted especially if those shifts would come at the expense of American military engagement in overseas defense missions from Korea to Iraq to Bosnia
