An Anthology of Global Risk SJ Beard, Tom Hobson, 2024-09-03 This anthology brings together a diversity of key texts in the emerging field of Existential Risk Studies It serves to complement the previous volume *The Era of Global Risk An Introduction to Existential Risk Studies* by providing open access to original research and insights in this rapidly evolving field At its heart this book highlights the ongoing development of new academic paradigms and theories of change that have emerged from a community of researchers in and around the Centre for the Study of Existential Risk The chapters in this book challenge received notions of human extinction and civilization collapse and seek to chart new paths towards existential security and hope The volume curates a series of research articles including previously published and unpublished work exploring the nature and ethics of catastrophic global risk the tools and methodologies being developed to study it the diverse drivers that are currently pushing it to unprecedented levels of danger and the pathways and opportunities for reducing this In each case they go beyond simplistic and reductionist accounts of risk to understand how a diverse range of factors interact to shape both catastrophic threats and our vulnerability and exposure to them and reflect on different stakeholder communities policy mechanisms and theories of change that can help to mitigate and manage this risk Bringing together experts from across diverse disciplines the anthology provides an accessible survey of the current state of the art in this emerging field The interdisciplinary and trans disciplinary nature of the cutting edge research presented here makes this volume a key resource for researchers and academics However the editors have also prepared introductions and research highlights that will make it accessible to an

interested general audience as well. Whatever their level of experience, the volume aims to challenge readers to take on board the extent of the multiple dangers currently faced by humanity and to think critically and proactively about reducing global risk.

Acceptable Evidence Deborah G. Mayo, Rachelle D. Hollander, 1994-02-17. Discussions of science and values in risk management have largely focused on how values enter into arguments about risks that is issues of acceptable risk. Instead, this volume concentrates on how values enter into collecting, interpreting, communicating, and evaluating the evidence of risks that is issues of the acceptability of evidence of risk. By focusing on acceptable evidence, this volume avoids two barriers to progress. One barrier assumes that evidence of risk is largely a matter of objective scientific data and therefore uncontroversial. The other assumes that evidence of risk being just a matter of values is not amenable to reasoned critique. Denying both extremes, this volume argues for a more constructive conclusion: understanding the interrelations of scientific and value issues enables a critical scrutiny of risk assessments and better public deliberation about social choices. The contributors, distinguished philosophers, policy analysts, and natural and social scientists, analyze environmental and medical controversies and assumptions underlying views about risk assessment and the scientific and statistical models used in risk management.

Rehabilitating Damaged Ecosystems Jr. Cairns, 2017-12-14. Built on a strong foundation in restoration ecology, this unique handbook provides practitioners, academics, and managers with vital tools needed to plan for ecosystem conservation, to restore degraded ecosystems, to make cost-effective restoration decisions, and to understand important legal issues. Rehabilitation of Damaged Ecosystems, Second Edition, boasts three completely new chapters and five major chapter revisions. Coastal wetlands restoration, watershed rehabilitation and management, mined land reclamation, revegetation of disturbed ecosystems, and river and stream restoration are only a few of the critical topics explored in this timely reference handbook. This Second Edition provides valuable, reliable data as well as practical methods and techniques for the ongoing fight to protect natural resources and restore damaged ecosystems.

Arthur H. Westing Arthur H. Westing, 2012-08-20. Since the 1960s, the environment has become an issue of increasing public concern in North America and elsewhere. Triggered by the Second Indochina War (Vietnam Conflict) of 1961-1975 and further encouraged by the International Conference on the Human Environment held in Stockholm in 1972, the environmental impact of war emerged and grew as a topic of research in the natural and the social sciences. And in the late 1980s, this led additionally to a focus and debate on environmental security. Arthur Westing, a forest ecologist, was a major pioneer contributing and framing both of those debates conceptually, theoretically, and empirically, starting with *Harvest of Death: Chemical Warfare in Vietnam and Cambodia* (1972), co-authored with wildlife biologist E. W. Pfeiffer and others. As a Senior Researcher at the Stockholm and Oslo International Peace Research Institutes (SIPRI and PRIO) and as a Professor of Ecology at Windham and Hampshire Colleges, Westing authored and edited books on *Ecological Consequences of the Second Indochina War* (1976), *Weapons of Mass Destruction and the Environment* (1977), *Warfare in a Fragile World: Military Impact on the Human Environment* (1980), *Herbicides in War*, the

Long term Ecological and Human Consequences 1984 Environmental Warfare a Technical Legal and Policy Appraisal 1984 Explosive Remnants of War Mitigating the Environmental Effects 1985 Global Resources and International Conflict Environmental Factors in Strategic Policy and Action 1986 Cultural Norms War and the Environment 1988 Comprehensive Security for the Baltic an Environmental Approach 1989 and Environmental Hazards of War Releasing Dangerous Forces in an Industrialized World 1990 as well as authoring numerous UN reports book chapters and journal articles This volume combines six of his pioneering contributions on the environmental consequences of warfare in Viet Nam and in Kuwait on the environmental impact of nuclear war and on legal constraints and military guidelines for protecting the environment in wartime

Where the Evidence Leads Robert C. Johansen, 2021 By shifting American security policy away from maximizing military power for the United States and toward maximizing human security for all policymakers and citizens can also maximize national security for the United States and sustainable peace for the world Why do war and political violence persist Political realists argue that violent conflict and the struggle for power are inherent in the international system and there is little we can do but manage it However as Robert Johansen argues in this path breaking work there are other ways forward In *Where the Evidence Leads* Johansen develops an empirical realist theory to enable the United States to respond more effectively to rising security threats Together peace research and security studies show that more security benefits are likely to result from maximizing the causes or correlates

of peace than from maximizing military power Ironically a global grand strategy for human security with national security folded into it is likely to produce more security for the United States than a national security strategy Peace reigns when states implement peace correlates which range from addressing all nations security fears to making life more predictable through better global governance This approach respectful of forgotten insights from Hans Morgenthau and others revolutionizes thinking about national security policy by bringing it into a human security framework The analysis shows that the anarchic militarized balance of power system can be gradually changed with help from enhanced lawmaking enforcement and governance capacities This thought provoking book builds bridges between past policies many of which have failed and more deft ways of handling new realities that focus on building peace In a world of threats this book opens doors onto a future of sustainable peace security and hope

Climate Change and Global Health Colin D. Butler, Kerry N. Higgs, 2024-07-30 There is increasing understanding that climate change will have profound mostly harmful effects on human health In this authoritative book international experts examine long recognized areas of health concern for populations vulnerable to climate change describing effects that are both direct such as heat waves and indirect such as via vector borne diseases This lively yet scholarly resource explores all these issues finishing with a practical discussion of avenues to reform As Mary Robinson former UN High Commissioner for Human Rights states in the foreword Climate change interacts with many undesirable aspects of human behaviour including inequality racism and other manifestations of injustice Climate change policies as practised by most countries in the global North not only interact with these long standing forms of injustice but exemplify a new form of startling magnitude This book will be invaluable for students post graduates researchers and policy makers in public health climate change and medicine

Environmental Sociology John Hannigan, 2022-09-09 John Hannigan s definitive textbook offers a distinctive balanced coverage of environmental issues policies and action This revised fourth edition has been expanded and fully updated to explore contemporary developments and issues within global environmental sociology Environmental Sociology reconciles Hannigan s widely cited model of the social construction of environmental problems and controversies which states that incipient environmental issues must be identified researched promoted and persuasively argued in the form of claims with an environmental justice perspective that stresses inequality and threats to local communities For example this new edition explores the interconnections between indigenous communities and environmental activists via a study of the difficult relationship between Aboriginal people and environmentalists in Australia The updated fourth edition also discusses new direct action protest groups such as Extinction Rebellion who have reframed the discourse around the climate emergency using apocalyptic language and imagery Environmental Sociology also signposts exciting new directions for future research The fourth edition reinterrogates the classical roots of environmental theory with a focus of the work of Alexander von Humboldt Hannigan also asserts the need for environmental sociologists to turn their attention to The Forgotten Ocean arguing that the discipline should incorporate

cutting edge concepts such as marine justice striated space and volumetrics Environmental Sociology is a key text for students and researchers in environmental studies political ecology social geography and environmental sociology The British National Bibliography Arthur James Wells,2009 Environmental Sociology Ed 2 John Hannigan,2006-04-18 This new edition of John Hannigan s well known and respected text has been thoroughly revised to reflect recent conceptual and empirical advances in environmental sociology and will prove to be a valuable student resource **Simple Solutions to Complex Catastrophes** John Braithwaite,2024-02-26 This open access book sets out simple solutions to managing complex catastrophes It focusses on four kinds of crises climate change crime war cascades epidemics and financial crises These catastrophes are conceived as complex and prone to cascade effects This book is optimistic in explaining that there are identifiable simple institutions that international society can strengthen and some simple principles that can help humankind to control the expanding gamut of complex catastrophes that confront the planet including simple stable institutions and regulatory bodies It draws on a wide range of current and past crises and challenges from the Cold War to COVID 19 and from Weapons of Mass Destruction to restorative diplomacy with States like China to provide an urgent and timely path forward Braithwaite argues that improved peacemaking and step by step progress toward abolition of Weapons of Mass Destruction helps prevent environmental pandemic and financial catastrophes His method across four kinds of crises is first to prioritize simple principles and simple institutions that prevent coupled catastrophes from cascading one to the other The next step is to pursue requisite variety in responses by diagnosing dialectically when additional interventions will and will not add value for crisis control Braithwaite argues that minimal sufficiency of deterrence responsive regulation of risks and restorative diplomacy offer superior theoretical foundations than realism in international relations theory and in organizational crime control It speaks to those interested in criminology public policy and international relations political science sociology public health and economics *Nuclear Winter* United States. Congress. House. Committee on Science and Technology. Subcommittee on Natural Resources, Agriculture Research, and Environment,1985 **American Hiroshima** David J. Dionisi,2005 American Hiroshima delivers concrete ideas to defeat terrorists strengthen democracy reduce weapons of mass destruction and establish the United States as a 21st century force for peace *Essays on Arms Control and National Security* Bernard F. Halloran,1986 These essays collected to commemorate the Arms Control and Disarmament Agency s 25th anniversary span not only ACDA s lifetime but the four decades of the nuclear era The articles provide a sampling of the arms control related speculation and controversy that has existed during those years Since many of the authors are either current members of the U S Government or have strongly influenced its policy over the years these essays on the formulation of U S arms control and national security policies have almost assumed the status of classics The authors represented include Fred Ikle Henry Rowen Paul Nitze George Kennan Robert McNamara Thomas Schelling Albert Wohlstetter and James Schlesinger S N 044 000 02164 1 12 00
