*Nuclear Power in an Age of Uncertainty* United States. Congress. Office of Technology Assessment, 1984      *Energy Abstracts for Policy Analysis* , 1983      *Nuclear Politics in America* Robert J. Duffy, 1997 Duffy s work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon com viewed August 24 2020      [Learning to Debate](#) Takeshi Suzuki, David Zarefsky, 2025-04-16 Written in an accessible style this textbook introduces undergraduate students to the theoretical and practical aspects of debate and outlines the fundamental skills of analysis and advocacy Debate teaches students how to solve the problems that we face in everyday and public situations This book allows readers to face such problems head on by equipping them with the knowledge and skills to analyze a situation propose solutions and present debates and arguments in a persuasive manner Organized into two parts the book begins by laying the theoretical foundations and offering a step by step guide to debate Students are shown how to compare pros and cons test evidence and reasoning and defend and develop their own positions Each chapter in part two explores key sample constructive rebuttal and summary debate speeches and includes exercises and assignments to allow students to actively engage with the material

Van Gerven,2022-01-31 Jesse P Van Gerven critically analyzes the movement for a carbon free and nuclear free energy future in the U S using an environmental justice framework Van Gerven explores how different social and environmental justice discourses are constructed through the claims of social movement organizations This study shows how ideas of distribution recognition and representation structure the arguments made by anti nuclear groups against the production of nuclear power Through this analysis the author identifies general principals of energy justice These principles can guide future energy policy and energy system development to ensure social and environmental justice **Nuclear 2.0** Mark Lynas,2014-01-30 Everything you thought you knew about nuclear power is wrong This is just as well because nuclear energy is essential to avoid catastrophic global warming While renewables will surely play an important part in our future energy strategy expecting them to deliver all the world s power is dangerously delusional In 2014 statistics showed that wind and solar power contributed only 1 per cent of global primary energy Similarly while energy saving has a key role to play in the developed world there is no possibility of humanity as a whole using less energy while the developing world is extracting itself from poverty And the fact is that the anti nuclear movement of the 1970s and 80s has made the world more dependent on fossil fuels In Nuclear 2 0 environmental campaigner Mark Lynas debunks the myths that have cast nuclear energy in a bad light Often overlooked because of concerns surrounding nuclear waste and radiation poisoning after the Chernobyl disaster atomic energy is one of the most impressive sources of low carbon power In this enlightening read Mark looks at the science and re evaluates the situation to unravel why our future is threatened not just by the big fossil fuel companies but also the professional anti nuclear Green groups This book is a call for all those who want to see a low carbon future to join forces and advocate a huge Apollo Program scale investment in wind solar and nuclear power

**Mad Science** Joseph Mangano, 2012-10-01 Will Americans once again play nuclear roulette Just one year after the Fukushima meltdown all 54 reactors in Japan have been closed and may never be restarted Germany recently closed several reactors and will shutter them all within a decade Italy revoked its pledge to build new reactors keeping that nation nuclear free All these decisions are based on the understanding that reactors are extremely dangerous and expensive In the U S the remnants of the once overwhelmingly powerful nuclear lobby are making their last stand for clean nuclear energy The sixty year old vision of power too cheap to meter words originally uttered by a banker promoting the industry is back While other countries end their reliance on nuclear energy Americans contemplate its revival even as existing reactors which produce a fifth of U S electricity pass retirement age and are corroding In *Mad Science* Joseph Mangano strips away the near smothering layers of distortions and outright lies that permeate the massive propaganda campaigns on behalf of nuclear energy He explores the history of the industry with its origins in the Manhattan Project through its heightening promotion during the Cold War and its entwinement with nuclear weapons *Mad Science* includes an account of nuclear accidents and meltdowns and their consequences from Chernobyl to Santa Susana and beyond as well as a point by point refutation of pro nuke arguments Atomic energy is unsafe it deals with staggeringly poisonous substances at every stage of its creation uneconomical in the extreme and impractical *Energy Research Abstracts*, 1990
